

MOSAIC OF BEAUTY

THE interest for orchid is growing in the city because of its ornamented beauty, variety and longevity. These characteristics have made it popular among orchid lovers. Cut flowers have more longevity than other flowers and lasts for at least one month. The live flowers and varieties of orchid bring touch of nature within the living environment. Orchid is cultivated throughout the year and different varieties and colours could be created through cross breeding. The gradual increase of the demand for orchid in the city made its place in the flower market. Bangladesh Orchid Society at Gulshan held a show to popularise orchids and introduce world varieties to the flower lovers.
