Triumph and Tragedy

One of the most influential thinkers of our time, Stephen Hawking in this new book takes us to the cutting edge of theoretical physics, where truth is often stranger than fiction, to explain in laymen's terms the principles that control our universe. Like many in the community of theoretical physicists. Hawking is seeking to uncover the grail of science--the elusive Theory of Everything that lies at the heart of the cosmos

Arrow of God, the second of Achebe's novels of colonialism, takes place

in the 1920s after the British have established a presence in Nigeria. The

"arrow of god" mentioned in the title is Ezeulu, the chief priest of the god

Writing an objective biography of Sheikh Mujibur

Rahman, the only larger-than-life political figure of

Muslim Bengal, is no easy task for a historian. In this

well-researched book, Sayyid A Karim has given a

fascinating account of the life of Sheikh Mujib and

makes an assessment of his legacy. Separating the

man from the myth, the author has drawn a moving

portrait of a heroic man who triumphed against all odds

and became the founding father of a new nation,

Bangladesh. While still young, Sheikh Mujib passion-

ately supported the Pakistan movement, believing that

the creation of a Muslim state was the best way of

emancipating Bengali Muslims from the twin yokes of

structure village life, a postition vested with

a great deal of power. In Ezeulu, Achebe

presents a study in the loss of power. After

his village rejects his advice to avoid war

with a neighboring village, Ezeulu finds

himself at odds with his own people and

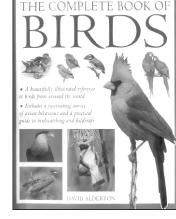

praised by the British administrators. The

British, seeking a candidate to install as

village chieftain, make him an offer, which

he refuses. Caught in the middle with no

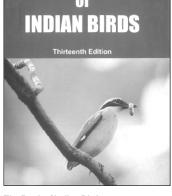

allies, Ezeulu slowly loses his grip on reality
