**SELECTION OF CONSULTANTS BY THE WORLD BANK**  
**Bangladesh**  
**Second Investment Climate Assessment**  
**CONSULTING SERVICES**  
**BUDGET ALLOCATION # EW-P099838-ESW-BB**  
**Expressions of Interest**

The World Bank intends to finance the assignment/services described below under a budget allocation for the Bank's administrative budget.

The services include undertaking a detailed survey on a nationally representative sample of about 1500 firms in Dhaka, Chittagong and some secondary towns, based on questionnaires to determine the investment climate (IC) prevailing, as well as the changes since the last survey conducted in 2002. Representative panel data will be used to analyze the productivity impact of policy measures on Bangladesh's manufacturing sector and firms' responses to changes in the domestic investment climate and external global conditions, including firms' adjustments to the post-MFA (multi-fiber arrangement) era. The panel data will be based on the IC manufacturing survey of 2002 and the present survey of urban manufacturing enterprises. The objective of the proposed IC assessment is to strengthen the capacity of the Government of Bangladesh to develop policies for private sector growth through the analysis of data systematically collected from firms. The study will also investigate a range of issues directly or indirectly related to public policy, such as technological improvement, business finance, upgrading of human capital and functioning of the labor market, government-business relations, and pricing and quality of public services for industry.

The expected outputs of the survey will be a dataset based on a state-of-the-art survey of firms in several important areas of economic activity across several regions in Bangladesh. It is expected that the sample of firm respondents will be drawn from the Bangladesh manufacturing, services, and other industries. The services that will be required include sample design and selection, refinement of the data collection instrument, selection, training, assignment, and direction/supervision of enumerators, supervisors, coordinators, and data entry staff, survey implementation, data processing and analysis. The consultant will work closely with the World Bank team at all times to assure quality maintenance and early detection of necessary changes. This survey is a follow-up to the first Investment climate assessment survey, conducted in 2002, and will attempt to identify and interview all firms that made the sample of the 2002 survey, as well as firms outside of Dhaka and Chittagong, and additional firms with a specific industry or issue focus, to be determined.

The World Bank will be responsible for supervising the survey work. Organizations/ Institutions/ Consulting firms having experience and resources in conducting major economic surveys in Bangladesh will be eligible to apply. The survey along with other required work is expected to commence from March, 2006 and be completed by September, 2006.

The World Bank now invites eligible consultants to indicate their interest in providing the services. Interested consultants must provide information indicating that they are qualified to perform the services (brochures, description of similar assignments, experience in similar conditions, availability of appropriate skills among staff, etc.). Consultants may associate to enhance their qualifications.

Consultants will be selected in accordance with the procedures set out in the World Bank's Guidelines : Selection and Employment of Consultants by World Bank Borrowers May 2004.

Interested consultants may obtain further information at the address below from 1000 hours to 1600 hours.

Expressions of interest must be delivered to the address below by March 02, 2006.
