

A Life-saving Innovator

Wrong diagnosis and medical negligence are rampant even in the most prestigious hospitals. This has led to a deterioration of public trust in medical professionals. Many patients complain that doctors refuse to talk to them properly or explain what their ailment is or how they will be treated. Those who can afford it and those who manage to scrape up their savings or use whatever source of funding they have, opt for going thousands of miles away where they believe they will get the right treatment.

Doctor Lutfur Rahman comes from a rare breed of medical professionals who want to change this trend by proving that medical treatments is just as good and sometimes even better right here in Bangladesh.
