Books

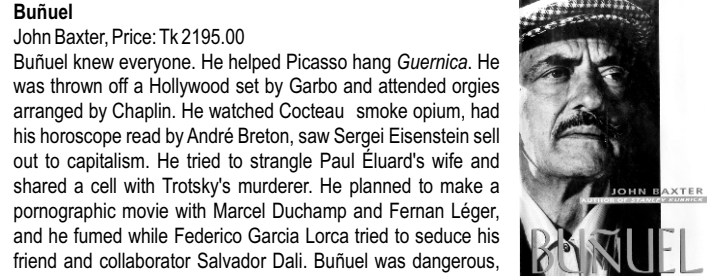

The Exotic in Western Music Edited by Jonathan Bellman Price: Tk 1350.00 Exoticism has flourished in Western music since the seventeenth century. A blend of familiar and unfamiliar gestures, this vibrant musical language takes the listener beyond the ordinary by evoking foreign cultures and forbidden desires. In this pioneering collection, distinguished musicologists explore the ways in which Western composers have used exotic elements for dramatic and striking effect. Inter-weaving historical, musical, and cultural perspectives, the contributors examine the compositional use of exotic styles and traditions in the works of artists as diverse as Mozart and George Harrison. The volume sheds new light on a significant yet largely neglected art form, and it makes a valuable contribution to music history and cultural studies.

How to Keep Tropical Aquarium Fish Jonathan Stuart Price: Tk 1350.00 Keeping tropical aquarium fish can be one of the most fascinating, engrossing and rewarding of hobbies. But, to the beginner, the whole subject may appear extremely complicated and technically daunting. There seem to be so many things to consider, so much equipment to understand, and so many marvelously diverse varieties of fish to choose from. This book is written specially for all those who have never owned an aquarium before but who want to keep an aquarium of tropical fish at home—however modest in size, or in varieties of fish, it might be. The book starts with the basics: available space for an aquarium, what size that area should be, electrical power for lighting and heating, what sort of fish and how many one can keep, need for plants in the tank, type of food one should feed the fish and when.

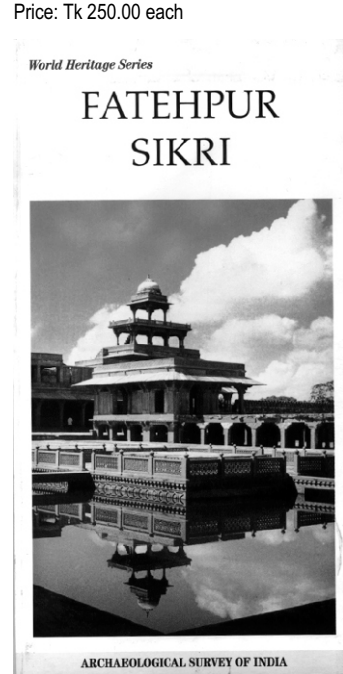

Once Upon a Number The Hidden Mathematical Logic of Stories John Allen Paulos Price: Tk 1628.00 The human imagination seems able to explore two very different worlds: the realm of mathematics, statistics and exact science, and the contrasting world of personal experience, our memories and emotions, the complex stories that make up a life. This delightful and original book explores the unexpected relationships that tie these two worlds together. What are the benefits and pitfalls of applying mathematical reasoning to stories and everyday life? How can we close the gap between meaning and information, narrative and logic? How can literary discussions of perspectives, scenarios and archetypes by combined with scientific talk of objectivity, definitive outcomes and universal truths? With anecdotes and witty observations about such phenomena as Bible codes, the statistics of stereotyping, and the probability of retrieving lost socks, John Allen Paulos examines these issues in his familiar engaging style.

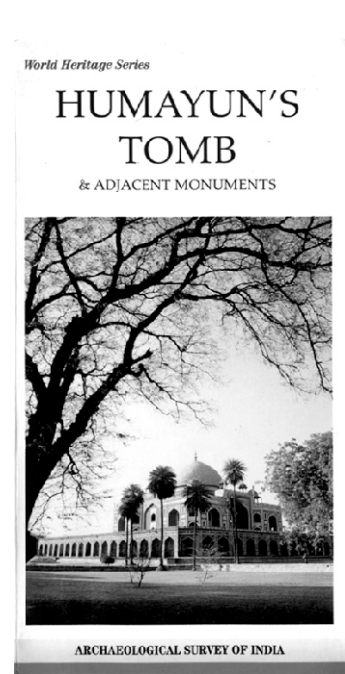

Buñuel John Baxter, Price: Tk 2195.00 Buñuel knew everyone. He helped Picasso hang Guernica. He was thrown off a Hollywood set by Garbo and attended orgies arranged by Chaplin. He watched Cocteau smoke opium, had his horoscope read by André Breton, saw Sergei Eisenstein sell out to capitalism. He tried to strangle Paul Eluard's wife and shared a cell with Trotsky's murderer. He planned to make a pomographic movie with Marcel Duchamp and Fernan Léger, and he fumed while Federico Garcia Lorca tried to seduce his friend and collaborator Salvador Dalí. Buñuel was dangerous, enigmatic, elusive. And he stands among the greatest creative artists of the twentieth century. His films, made over a fifty-year period from his 1928 Un Chien Andalou—with its infamous image of a razor drawn across a girl's eyeball—to a late blossoming in the sixties and seventies with Belle de Jour, Viridiana, and The Discreet Charm of the Bourgeoisie, still retain their power to shock.
