Grameenphone launches digital care platform to serve the hearing and speech impaired

Grameenphone launched sign-line digital care dedicated to the speech and hearing impaired on February 16, 2020, at The Westin Dhaka. It is operated by the hearing and speech impaired community.

Through this initiative,

Grameenphone has incorporated sign language based digital care service in its official website and its self-service digital care app MyGP. Furthermore, the 'Kothagulo Hariye Na Jak Shobder Obhabe' campaign will enable interested members of

the community to learn the basics of sign language through a tutorial video by sign language expert Arafat Sultana Lata. Anyone can access this sign language video tutorial from Grameenphone's official website and YouTube channel.

The device is backed by a 4500mAh battery with fast charge support. The devices will be available in Aura Black and Aura Glow.

Facebook's new app is aimed at the creative minded

Facebook's NPE Team has introduced a new experimental app called Hobbi, a photo and video sharing app designed to document personal projects and hobbies.

The app is visually similar to Pinterest, but is designed to be less of an idea pin-board and more of an archive for creators, with the main purpose being to help hobbyists

organize photos of their own projects into themed collections, and allowing them to document their progress over time. The app also lacks any major social networking component, beyond the ability to create video highlight reels to share externally.

Hobbi is currently available for download on iOS in a few selected countries.

35 free public Wi-Fi zones in Cox's Bazar

35 public Wi-Fi zones have been set up to provide free internet services in Cox's Bazar. The residents and tourists, nearly 34,000 people, in Cox's Bazar will now be able to access e-government services and internet from the free Wi-Fi zones with maximum 20 Mbps speed from their mobile phones, pads or laptops without any limitations at a time.

Bangladesh Computer Council (BCC) is implementing the 'Digital Sylhet City Project' with the development of 'Public Wi-Fi Zone' in Sylhet and Cox's Bazar to facilitate people with easy access to government services along with other internet services at free of cost. Huawei has provided the cloud-managed public Wi-Fi solutions for this project.
