

Tobacco farming continues with increasing trend

Growers are showing interest in tobacco as it is more profitable than other crops

OUR CORRESPONDENT, Lalmonirhat

Cultivation of harmful crop tobacco continues with increasing trend in Lalmonirhat as growers are getting lucrative offers from different tobacco companies.

Almost all the fields have been covered with the harmful crop at the villages in the district from January to April every year.

Although farmers now understand the harmfulness of tobacco farming, they continue cultivating the crop as different tobacco companies are tempting them with incentives including free seeds, fertilisers and technical support.

Above all, growers are showing more interest in farming tobacco as it is more profitable than other crops, said locals.

"Tobacco cultivation needs a lot of hard work. More fertiliser is required for applying in tobacco farming but we are still benefiting from tobacco cultivation. As tobacco cultivation earns us good profit, we are giving importance to tobacco farming rather than other crops," said Nabir Uddin, a farmer of Sarpukur village in Aditmari upazila.

"Of course, the tobacco company supports us in many ways for the cultivation of tobacco. We get seeds and fertilisers free of cost," he said.

Without the cooperation and assistance of the tobacco company, it would not be possible for them to produce quality tobacco, said Saber Ali, another farmer of the same village.

All the family members, including his children, work at the field as tobacco farming earns them good profit, said Saber Ali.

An official of Department of Agricultural Extension (DAE) in the district said tobacco has been cultivated

on 9,100 hectares of land this time, which was 8,950 hectares last year.

If the tobacco companies do not stop their activities, tobacco cultivation will increase in the district day by day, said

journalist Majed Masud, a member of Lalmonirhat district unit of Anti-tobacco Media Alliance.

Upazila Agriculture Officer of Lalmonirhat Sadar Enamul

Haque said they are trying their best to discourage farmers from farming tobacco but the growers do not listen to them because they are trapped in the attractive offers of the tobacco companies.

One more child dies of measles in Rangamati

Death toll reaches 7, medical team flown to the area yesterday

SANJOY KUMAR BARUA, Rangamati

One more Tripura child died of measles in remote Lungghian Para of Rangamati's Baghaichhari upazila early hours yesterday, raising the total death toll due to the disease to seven.

The latest victim, Kheti Bala Tripura, 13, passed away when she was under treatment at her house, said Md Ahsan Habib, upazila nirbahi officer (UNO) of Baghaichhari.

On Monday, another Tripura girl of Lungghian Para died. Earlier, from February 26 to March 17, five indigenous children belonging to the Tripura community in remote Arun Tripura Para of Sajek union died of measles.

"A 16-member team including two MBBS doctors and army personnel reached Sajek by helicopter this [Tuesday] noon. They will go to the affected area on foot," said the UNO.

"The measles affected children are suffering from malnutrition, adding to the situation," said Dr Istekhar Ahmed, upazila health and family planning officer of Baghaichhari.

"Why have we to watch our children die without proper treatment?" Mithun Joy Tripura, a karbari (local headman) of Lungghian Para, said yesterday morning.

Hiranondo Tripura, a ward member of the area who was on the spot, said, "The affected children should be taken to the district town by helicopter for their proper treatment."

Brigade Major Rumon Parvez, who is stationed at Khagrachhari, said, "Our team already reached the measles affected area with helicopter. We approached the authorities to bring the affected children to the district town's hospital by helicopter but they did not agree due to lack of disease infection prevention equipment in the aircraft."

Around 130 children, aged between one and 15 years, of Tripura and Chakma communities have got infected with measles in Arun Tripura Para, Lungghian Tripura Para, Tarun Tripura Para, Kamalapur Chakma Para, and Kaikhya Tripura Para of Sajek union since early last month, said local public representatives.

Contacted before the medical team reached the area, a health assistant seeking anonymity said, "I have to stay here following order from the high authorities. Doctors give me medical advice over phone, which is not enough to deal with the affected children."

It takes around 10 hours to reach there from Rangamati town on foot as there is no road or water transport link.

This correspondent made several calls to reach Rangamati Civil Surgeon Bipash Khisa but he did not receive the calls.

Meanwhile, people in Bandarban claimed that a child died of measles and around 40 others, including 33 children, were infected with the virus in a remote area of the hill district.

Health officials, however, said that the child died of an unknown disease.

The campaign to vaccinate 34 million children, aged between 9 months and 10 years, against measles and rubella was scheduled to begin last Wednesday. But the programme was postponed over the ongoing outbreak of coronavirus.
