# Japan braces for worst pos-twar economic slump

Japan's economy braced for its worst postwar slump even as first-quarter GDP contracted less than initially thought, as the coronavirus crisis slams the brakes on global growth and raises pressure on Tokyo to cushion the blow to business and consumers.

Banks are doing their bit to help as lending rose at the fastest annual pace on record in May, a sign companies were tapping loans to meet immediate funding needs to survive slumping sales from the pandemic.

While U.S. and European policymakers have shifted from crisis-response to efforts to prop up growth, Japan is struggling to do so as it continues to focus on preventing a second wave of infection.

In an interview with Reuters, economy minister Yasutoshi Nishimura said Japan should primarily focus on back-stopping faltering businesses, suggesting the central bank should avoid pushing interest rates deeper into negative

"We're not at a stage yet where we want to stimulate consumption and encourage people to travel a lot. Efforts to stimulate consumption should wait a bit more," he said, when asked whether the Bank of Japan should take steps to boost demand, such as deepening negative interest rates.

third-largest world's

economy shrank an annualised 2.2 per cent in January-March, revised data showed on Monday, less than the 3.4 per cent contraction indicated in a preliminary reading, as capital expenditure fared better than expected. Analysts had tipped a 2.1 per cent contraction.

But few analysts were hopeful about the outlook for the year since capital spending data used to calculate the revised figures lacked enough responses - most struggling firms appear not to have participated in the survey - and will be updated in July.

On the whole, Monday's revised

outlook for 2020 thus remains extremely challenging.

A series of recent data including exports, factory output and jobs figures suggested Japan is facing its worst postwar slump in the current quarter, a period when Prime Minister Shinzo Abe announced a state of emergency requesting citizens to stay home and businesses to close.

Although the emergency was lifted in late May, the economy is expected to recover only moderately in coming months, underlining the pandemic's sweeping impact.

The surge in bank lending, shown in BOJ data also released on Monday, suggests companies are being forced to hoard cash just to stay afloat - and that the worst is yet to come.

The head of Japan's ANA Holdings Inc said the airline will cut unprofitable international routes to cope with the hit from the pandemic, according to the Asahi newspaper.

Tokyo policymakers are moving fast to stop the bleeding.

Japan's parliament will begin deliberating on Monday a second supplementary budget to fund part of a fresh \$1.1 trillion stimulus package that includes loan schemes and a framework to inject capital into struggling firms.

The BOJ eased monetary policy for two straight months in April, focusing on steps to ease corporate funding strains.

### Nokia's broadband business boosted as COVID-19 pressures networks

Finnish telecom equipment maker Nokia is seeing a pick up in orders as its broadband clients race to upgrade networks to meet higher user demand during the COVID-19 pandemic, a company executive said.

Many customers had planned to grow their network by 30 per cent to 40 per cent over the next few years assuming a similar growth in traffic, but COVID-19 brought in that traffic growth overnight, Sandy Motley, Nokia's President of Fixed Networks, told Reuters.

"Customers will need to accelerate the growth that they had planned in the future, and we've seen customers already talking to us about that," she said, adding orders for fixed networks were up 22 per cent in the first quarter.

Nokia boosted its fixed-line networks business with the 2016 purchase of Alcatel-Lucent in a 15.6 billion-euro (\$17 billion) deal. The unit's revenue fell 18 per cent year-on-year in the first quarter and 5 per cent between 2018 and 2019 but Motley said the decline was due to business cycles.

"We have seen some upgrades from our customers... but we think a lot of this drive will be more medium term and long term, Motley said.

The European Commission has proposed that by 2025 all European households, rural or urban, should have

access to networks offering download

speeds of at least 100 MBps. It takes time to build a new fixed network as the installation of fiber cabling

can't be done overnight, Stefaan Vanhastel, CTO of Nokia's fixed networks business, told Reuters. "Certainly we see that operators are

starting to consider accelerating fiber rollouts," he said.

Fixed broadband carries about 90 per cent of all internet traffic in Europe, according to a report by research firm Analysys Mason.

In 2019, Nokia's Fixed Access business amounted to around 10 per cent of the company's main networks business sales, with Mobile Access accounting for

## Asian companies at higher risk German industrial output posts record plunge of default this year: analysis

Asian companies are at a higher risk of default in the coming quarters than last year, a Reuters analysis of their credit ratios showed, as the coronavirus pandemic has squeezed revenue and made it harder to refinance debt.

One measure of how easily a company can pay interest on outstanding debt - operating profit to interest ratio - fell to the lowest in 11 years at the end of March. The sample took into account companies worth at least \$500 million with available data

Net debt to EBITDA (earnings before interest, taxes, depreciation, and amortisation), which shows how many years it would take a company to pay back debt, was at its highest since June 2014.

"We expected the pick-up in default rates to be mostly amongst smaller companies who already had a stretched liquidity profile and less access to alternative funding channels," said Alaa Bushehri, head of emerging market debt at BNP Paribas Asset Management.

"This is being exacerbated now by COVID-19 lockdowns, slow-down in activity and a lower commodity environment.

Energy, real estate and utilities firms topped default risk charts, Reuters found.

Airlines were the worst affected with flights grounded and people unwilling to travel. Virgin Australia, for example, entered into voluntary administration in April.

Late last month, Moody's forecast

issued by non-financial Asia-Pacific of the company missing its interest firms would climb to 6.4 per cent by the end of this year, from 2.3 per cent

restructure their debt to avoid default, especially offshore debt.

That could be an uphill task as a sharp depreciation in Asian currencies this vear has increased repayment costs of companies that have borrowed in dollars and have no natural or financial hedges in place, said Buddhika Piyasena, head of Asia-Pacific Corporate Ratings at Fitch Ratings.

The yield on a bond issued by China's Tianqi Lithium Corp, for instance, climbed to about 60 per cent to funding.

payments this year. It is currently trading at 40 per cent.

About \$100 billion worth of dollar Some companies will try to bonds are maturing between June 2020 and December 2021, according to Refinitiv data.

"High-yield companies with weak credit quality will likely have increasing difficulty refinancing offshore bonds, given coronavirus induced market volatility and investors' heightened risk aversion," Moody's analyst Sean Hwang said in a note.

"We expect investors to be increasingly selective in managing their high-yield exposure, which will weaken low-rated companies' access

German industrial output posted a record plunge in April as the coronavirus pandemic forced manufacturers in Europe's largest economy to halt production, with firms expecting a bumpy road ahead despite a massive stimulus package.

Industrial dropped by 17.9 per cent on the month, figures released by the Statistics Office showed. A Reuters poll had pointed to a slightly smaller fall of 16.0 per cent.

decline of -35.3 per cent. Output in the energy sector dropped by 7.2 per cent and construction was down 4.1

As measures to contain the spread of the coronavirus were implemented from mid-March, the restrictions took their toll on a full scale in April, the Economy Ministry said.

"The low point has been reached. With the gradual easing of protective measures and the resumption of production beginning now." The data strengthens expectations that said on Monday.

stimulus package will help Manufacturers of capital goods recorded the steepest economic activity pick up again in the second half of the year. German Chancellor Angela Merkel's cabinet plans a special meeting on Friday to start implementing large parts of the stimulus measures, three sources told Reuters on Monday.

The cabinet is expected to clear the way for the agreed temporary cut in value-added tax, cash handouts for parents

and bigger incentives to buy electric cars, the sources said. Despite the package, manufacturers expect production levels to decline further in the coming three months, but in the automotive industry, the economic recovery is at a slower pace than previously, the Ifo economic institute

### Italy's economy to shrink over 8pc

Italy's economy is set to shrink 8.3 percent this year as the coronavirus crisis takes its toll, according to a forecast Monday by the National Institute of Statistics.

The eurozone's third largest economy expecting its worst recession since World War II after a nationwide lockdown was imposed for more than two months to try to bring the pandemic under control.

The institute (ISTAT) said it forecast a rebound of 4.6 percent next year.

It was very difficult to quantify the impact of the "unprecedented shock" to the economy, ISTAT said, and its forecasts were subject to "a large decree of uncertainty compared to the past".
