

Audi brings three new cars to Bangladesh

Progress Motors Imports Limited, the authorized representative of the Audi brand in Bangladesh, has launched 3 new models this June.

2020 Audi A6 40 TFSI

The eighth generation of Audi executive Sedan, the A6 incorporates numerous innovation and feature. Power comes from a 2.0 liter inline 4 mated to a 7-Speed S-tronic transmission delivering 190 HP and 236 lb-ft of torque. The model comes standard with panoramic sunroof, LED headlights,

genuine Milano leather seats, 18" Alloy wheels, and four-zone air conditioning system. Price: BDT 1.06cr.

2020 Audi Q3 35 TFSI

The second-generation Audi Q3 subcompact crossover features a digital cockpit and a large MMI touch display. It's 1.4-liter, 7-Speed S-tronic generating 150 HP and 184 lb-ft of torque. The Q3 comes standard with panoramic sunroof, LED headlights with dynamic turn signal, genuine leather seats, 18" Alloy wheels, Audi Virtual Cockpit plus suite, and three-zone air conditioning system. Price: BDT 76 Lacs

The 2020 Audi Q8 55 TFSI quattro®
The new Q8 is the new face Audi's

mid-Size SUV, which Audi claims to "combine the best of luxury saloon and practical versatility of SUV". The powerplant of this giant SUV is a 3.0 liter V6 mild hybrid system, which has a respectable output of 340 HP and 368 lb-ft of torque. The said power is sent to all four of its wheels through an 8-Speed tiptronic transmission. The standard Q8 will have panoramic glass sunroof, HD Matrix LED headlights with dynamic turn signal, Bang & Olufsen sound system, 21" alloy wheels and is priced at BDT 1.99cr.

All three models will come with an unlimited mileage warranty of 2 years.

EDITOR'S NOTE

Is it a bird? Is it a plane? Is it a cloud service?

While a lot seems to be going downhill, cloud services are pushing us quickly towards a digital lifestyle we'd only been watching in science fiction. Businesses are now moving virtual as explained in our cover story. And we've taken sports, the most physical of all endeavors online because we can't be touching, hitting, punching each other anymore.

Which is kinda scary because remember that part in Wall-E where we see humans unable to move because all they do is order everything online, have machines do their bidding and never have to lift a finger. Well, we aren't there yet.

ICU Finder: Website on info for corona patients

NAHALY NAFISA KHAN

The ongoing coronavirus crisis is taking a heavy toll on our already fragile healthcare system. Newer problems are arising every day including lack of testing facilities, specialised care and ICU units for critical patients. The crisis is escalating every day with fewer ICU units being available, and the scarcity of information regarding these units are making the difficult situation even more herculean.

Realising the gravity of the situation, an enthusiastic young bunch consisting of students from Bangladesh University of Engineering and Technology (BUET), Dhaka University (DU), Shahjalal University of Engineering and Technology (SUST) and many from medical colleges started working on gathering all the information regarding ICU and COVID-19 beds under one

common platform. That's how the ICU Finder web app came into being.

Omer Faruq from DU, who is involved with this project said, "A friend of ours from BUET found it very difficult to avail an ICU bed for his father who was a critical corona patient. Another friend from my university had to go through the same troubles. These people could finally avail ICU beds because they could connect to the right people, thanks to the continuous efforts from their friends from universities. But sadly, that is not the reality for most people in the country. This made us realise the importance of a proper database with real-time information regarding ICU and Corona units all around the country, and we started working on it."

Users have to go icufinder.web. app and search districts, hospitals and

areas from the search option to get the necessary information. The information includes the number of ICU beds and other facilities dedicated to corona patients and the number of vacancies as well.

Faruq said, "We have already compiled and arranged all the static data in the site. The web app now contains information such as the number of ICU units, Corona beds and contact information regarding all the hospitals that are providing treatment to the COVID-19 patients.

Healthcare providers including doctors and nurses working in different hospitals can sign up and update relevant information about their respective hospitals. The number of vacant ICU beds is updated multiple times a day.
