# Govt loses Tk 12 crore annually for Shantibahani atrocities

RANGAMATI, May 22 Abduction and killing of fishermen and atrocities on them by tribal terrorists deprived the government of earning an estimated revenue of Tk 12 crore from fishing in the Kaptai Lake in one year till last April, reports UNB.

At least 50 fishermen have been killed in the lake and its adjoining areas by the outlawed Shantibahini since last year's mid-April when two were kidnapped and chopped to death, officials here told UNB Friday.

They fell victims to the wrath of tribal terrorists for their refusal to pay tolls.

announced, he said.

alone, he said.

started fishing in the lake on a commercial basis in 1965-66 when it extracted 206 metric tons of fish.

The KLDMP got the highest 4,242 metric tons of fish in 1983-84. Last year it earned nearly 16 crore taka from sale proceeds excluding 30 per cent quota of the catch for fishermen.

There are 72 species of fish, including six foreign varieties and two kinds of shrimps in the lake, the longest in the subcontinent with area of 58,300 hectors, the highest depth being 35 metre. It is 128 km long and 28 km wide.

The area of the lake, created in 1961 following construction of the Karnafuly Hydro-Electric Project, however, varies from 48,000 hectares during the dry season

to 68,800 nectares in the win-

On an average, the fish production per hectare during the last few years was 77 kilogram. The per hectare production ranges from 20 to 170 kg in different countries of the

April-May is the peak time to catch highest quantity of fish as water of the lake recedes to the lowest level of nine meter.

But, the lake has been the trouble spot with the tribal insurgents extracting tolls from the fishermen. Those refusing to pay fall prey to their atrocities. This has restricted their free fishing in the lake. offi-.

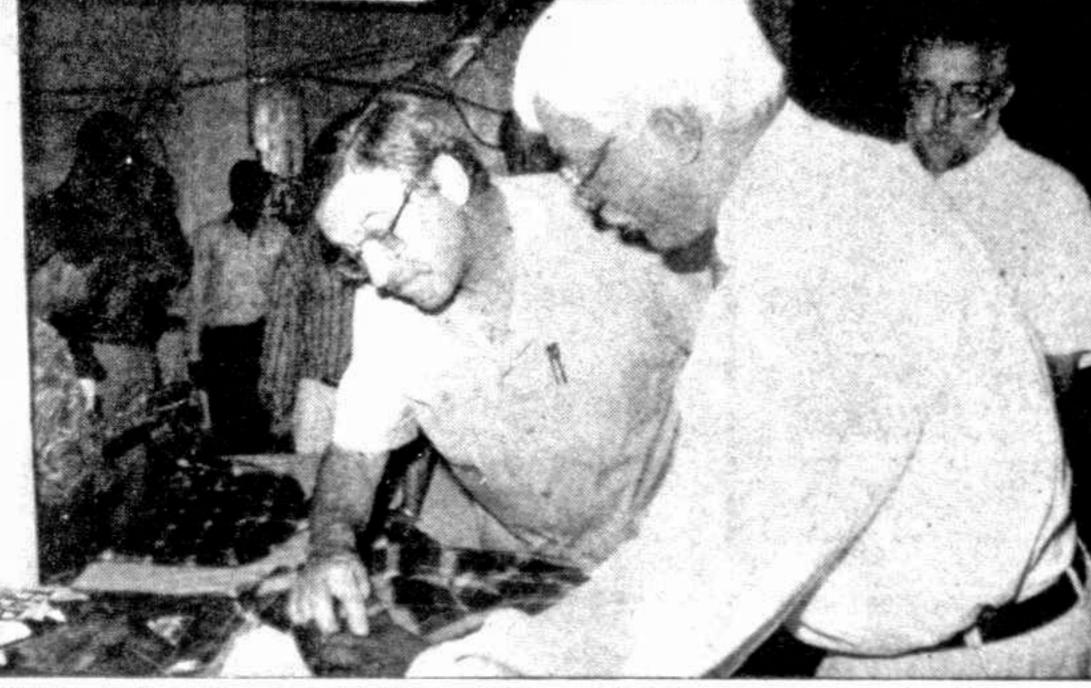

About 2,000 fishermen catch fish in the lake with 13 types of fishing nets. Besides.

1,000 more people are engaged in transportation, drying, marketing, trade and management. Their dependents number 15,000.

Continued terrorism by the outlawed Shantibahini as well as siltation and pollution of the lake water by shifting cultivation and waste products from launches and engine boats have posed a serious threat to the fish cultivation.

Experts say this may also hamper production of the Karnafuly Hydro Station.

Unplanned fishing and irregularities of the concerned officials have also contributed to reduced earning by the Fisheries Development Corporation.

US Ambassador in Bangladesh William B Milam visited the garments factories of Fortuna group in the city on Tuesday. Chief of Economic Division of the embassy Michael McNaull accompanied the Ambassador. The Managing Director of Fortuna group M A Taher showing finishing of an apparel to the Ambassador.

#### Commentary

# Bullish trend at Dhaka Stock Exchange: A note of caution

By Abu Ahmed Guest Columnist

During the last one month the Bangladesh stock market has seen a phenomenal rise in stock prices pushing the hitherto a stand still DSE Composite Price Index from 290 to 305 in the week ended on May 14. The increase was marked, at the Bangladesh Export-Import Company (Beximco) stocks price jumped from Tk 10 to Tk 15 within a week.

Later, the increase spread over to some other stocks like Ctg. Cement, Beximco Pharmaceuticals, Apex Tannery and Monno

In two weeks time starting from 30th of April and ended on 14 of May, the price for Beximco Pharmaceutical stocks moved up from Tk 238 to Tk 305 (a 28% rise), that of Apex Tannery from Tk 216 to 270 ( a 25% rise). and that of Monno Ceramic from Tk 168 to Tk 225 (a 34% rise). In this period, on average stocks worth of Tk 12 lakh were traded daily on the floor of the Dhaka Stock Exchange, and most contributions were made by the above few stocks.

In the previous two weeks, stocks of Beximco contributed mostly to the total trad ing volume and its price rise. During that period Beximco paper prices increased by fifty

Among the holding companies (actually they are subsidiaries) the stocks of Osmania Glass and Ctg. Cement held sway over other costocks in term of price increase. In two weeks time ended on May 14, Ctg Cement stocks increased from Tk 221 to Tk 264 (a 19% increase) and that of Osmania Glass sheet from Tk 227 to Tk 267 (a 17% rise)

Noticeable that, only the scrips of the above half a dozen stocks registered a sharp rise within a span of one month period while other stocks moved very little in price. This puzzles the ordinary investors in understanding what caused this sudden hike in the prices of those selective stocks. To most of the market-watchers speculation playing a big role behind this price upsurge of the selective stocks.

Apart from speculation, another rationale explanation for the recent price rise of selective stocks is that some of these stocks remained undervalued in the past, now potential investors have focused their attention on them and the prices are moving towards right places

Other explanation, which are not credible though, that foreign funds, specially, from Hong Kong is pouring in Bangladesh stock market, and that has caused prices of selective shares go up.

However, behind all these explanations

there is one more explanation which is the most important in the price upsurge of these stocks, and that is, the confidence factor. Stocks whose prices soared up recently are those which were trusted by the investors for regular good dividend offering. In Bangladesh's aiding stock market the managements of Beximeo group, Monno Ceramic and Apex Tannery are still taken with confidence by the investors. Of the other two stocks of Ctg Cement and Osmania Glass Sheet the rise occurred because these two companies maintained a good dividend rate offer to the investors in the past compared to other holding companies, mostly, due to a protracted market they have for their products at this moment.

Another factor that contributed to the price rise of stocks of these two companies is that operators are speculating about a hundred per cent privatisation of these companies through the selling of fiftyone per cent remaining shares now vested with the government. It was

also heard that Malaysia showed interest in buying the rest of the govt's shares in the Ctg Cement, and Osmania Glass Sheet was going to be modernised with a foreign help.

For an investor, rise in stock price is a happy news, though it is not clear whether a chaotic rise is a happy news or not. But to the speculators and direct operators in the stock market chaotic rise in stock prices is preferable as they can make most gain in such a situation, most of the time, at the expense of simple-minded investors.

What creates chaos in stock prices? Yes, many factors, also the human factors. Sometimes the operators themselves create chaos by turning into manipulators, and then sell when investors buying and buy when investors selling. Which price is the right price: Whether the investors selling price or the operators buying price?

Normal rule is that investors can not compete with the operators, because, the latter are the price setters, and the former are price takers. This prevent also the investors from continuous reshuffling of their portfolios which is a basic requirement for making gain through stock market investment. This also keeps away many other investors from investing in financial assets like stocks, bonds. An ordinary investor can not keep pace with the moving prices because of the time taken in buyingselling process through a broker. In many cases the lengthy time in transaction process puts an investor in a disadvantageous position in the form of rise of prices of desirable stocks to a point wherefrom there is every likelihood that they will be falling.

Apart from losing, gains from the lengthy time element taken in completing a deal through a broker the investor is also to see whether the price surge of stocks is a result of human manipulation. A stock's price is moving up does not mean that it is becoming more valuable to an investor or adding in real value to itself, but may be going up simply because somebody wanting it to go up. Manipulation is a practice widely used in stock trading either singularly or in collusion with others, and investors are to be cautious about such a move while deciding investment in stocks.

Manipulation is easier to be carried out in a small stock market like ours where buyers and sellers are few and where stock transactions are not overseen and regulated. When prices of stocks reach a high point because of non-economic factor the manipulators sell off their stocks and appropriate the gain at the cost of last entrants to the market.

They can do otherwise also, can manipulate the prices downward, create panic in the minds of stock holders, tempt them to sell at low prices, and then do whatever is needed to push the price up again.

in both the cases of manipulation whether towards a downward or an upward the investors are to become the victims of the practice, they buy when it is actually a time for selling, and they sell when it is a time for buy-

In Bangladesh, we do not have any significant stock market as yet but whatever market we have that is also not overseen, or regulated. There are crashes here too, but goes unnoticed, because, investors in large numbers are not still involved in stock investment, they prefer the bank investment to a stock investment. Govt should pay more attention to stock market development, as only through this we can derive benefits of a market economy.

# River Instt earns Tk 1 cr

FARIDPUR, May 22 Bangladesh River Research Institute earned one crore Taka out of sales proceeds of different model studies in the current fiscal year, reports

This was stated at the sec-

ond meeting of Board of

Governor's of the Institute in Faridpur Thursday with Minister for Agriculture, and Irrigation, Water Development and Flood Control M Majid-ul-Haq in the chair. Minister for Health and Family Welfare Chowdhury Kamal Ibn Yusuf. Irrigation Secretary Mohammad Asafuddowlla, Chairman, Water Development Board M A Razzak, Director General, River Research Institute, Syed Anwar Yusuf, Professor of Bangladesh University of Engineering and Technology, Dr Ainun Nishat and former Secretary M Shamsul Haq attended the meeting.

The construction work the River Research Institute was initiated in 1977 with the financial assistance of World Bank, UNDP and Danida and was completed in Faridpur in 1989. The institute was established on 35 hectares with a cost of about Taka 70 crore.

The Institute is carrying out research on flood control, river training, study on Hydrolic model for water resources development and experiment on ground water. The Institute is also provid-

ing the services to the United Kingdom, the Netherland and France in river research activities. The Institute is saving a sizeable amount of foreign exchange by doing different study and research work, which were earlier done in foreign countries.

The Minister expressed satisfaction at the overall performance of the Institute.
