## DON'T JUST FILE IT, CANOFIL IT.

MOUNTAINS OF DOCUMENTS & MILES OF FILES CAN BE TURNED INTO AN INFORMATION RESOURCE

WITHIN IT YOU ARE ABLE TO PUT TEN YEARS OF FILES

**Canon**

In Bangladesh thousands of tons of documents are being piled up in Government offices, Financial Institutions, Business houses, NGO's & Educational Institution. The paper management and space for the preservation of documents appears to have been one of our national problems.

How much can you squeeze into an area measuring just a quarter of this ad? If however you had the Canofile 250 you'll be able to store 13,000 A4-size pages, or 65 box

files, or 20 filing cabinets full, in an optical disk size of your palm. In other words, a lot. But don't take our word for it. Canofile can scan 40 A4-size pages in one minute. And store the information in non-erasable mode which prevents accidental erasure, or the erasable mode where old information can be deleted. Remember to double check the laser quality printouts which display a resolution of 400 dpi. If you think all these features mean it's a difficult machine to master, a few minutes with a Canofile will change that.

Canofile 250 System can be interfaced with your existing Computer environments.
