Chinese bank claims high rate of success in microcredit

BEIJING, Sept 10: Giving small loans to lift women out of poverty is a major issue at Beijing's world women's meeting and a remote district bank is setting trends in China, where credit is a monopoly of a Stalinist-style banking system.

nervousness over loaning money outside the state system. 'Shanxi is the first province to give cheap loans to rural women who live in poor countries to help them become better off,' said Yan Dianshan, Vice Chairman of the Women's Federation of the northwestern province.

women whose annual income in under 680 yuan 81 US dollars living in 50 areas designated as poverty districts in Shanxi. 'We usually do not give money directly to poor women,' Yan said. 'We give them chickens, rabbits, piglets and other materials to make it easy for them to repay or we lend money to better-off women responsible for poverty relief work for poorer women.'
