

Workshop on malnutrition told

Majority suffering from protein-energy deficiency

Participants at a workshop in the city yesterday presented an alarming picture of protein-energy malnutrition afflicting a vast majority of the country's population, particularly the under-five children, reports UNB.

About 70 per cent of the population suffer from anaemia due to iron deficiency, 69 per cent from iodine deficiency and 1.8 per cent of children from night blindness due to Vitamin A deficiency, according to statistics presented at the workshop.

Malnutrition reduces both physical and mental growth and development and the overall productivity of an individual.

Bangladesh's total protein intake is about 45 gram per person per day, which is almost equal to the requirement, but, a large part of this protein (30-40 per cent) is burnt up to partially meet the calorie gap.

Due to this phenomenon, the people suffer from both energy and protein deficiency, together known as protein-energy malnutrition. This is reflected in almost universal (around 94 per cent) prevalence of malnutrition among the children aged below five

years, the participants said. Bangladesh Institute of Research and Training on Applied Nutrition (BIRTA) organised the two-day consultative workshop on 'incorporation of nutritional considerations and objectives into the agricultural development plans and programmes in Bangladesh'.

Agriculture Secretary Dr AMM Shawkat Ali inaugurated the workshop at the Bangladesh Agricultural Research Council auditorium Tuesday morning, saying that a nation cannot prosper if a vast majority of population suffer from protein-energy malnutrition.

Terming the malnutrition a global problem, the Agriculture Secretary said malnutrition situation is not unique in Bangladesh, rather the same picture is seen in almost all developing countries in Asia, Africa and Latin America.

In Bangladesh, about 85 per cent of total calorie come from cereals alone and only 4.4 per cent and 2.7 per cent come from fats and oils. Fruits and vegetables provide only one-fifth and pulses and beans provide only half of the desired quantity.

Bangladesh Diploma Medical Association yesterday brought out a procession in the city in support of their various demands. — Star photo

Weather

Temporary rain likely

Temporary rain is likely to occur at a few places over Rajshahi, Dhaka and Sylhet divisions and at one or two places elsewhere over the country effective for the next 12 hours ending 6 pm today, reports UNB.

Met office says slight rise in day temperature is expected across the country.

In its outlook for subsequent two days weathermen predicted rainfall activities is likely to increase while forecast little change in the following five days.

Country's highest temperature 33.8 degree Celsius was recorded at Rajshahi and the lowest 24.5 degrees at Kutubdia and Sylhet.

The sun sets today (Wednesday) at 6:30 pm and rises tomorrow (Thursday) at 5:34 am.

Maximum and minimum temperatures and humidity recorded in some major cities yesterday were:

City/Town	Temperature in Celsius		Humidity in percentage	
	Max	Min	Morning	Evening
Dhaka	32.0	27.2	81	86
Chittagong	31.7	26.4	86	80
Rajshahi	33.8	25.4	89	85
Khulna	33.5	26.8	82	80
Barsal	31.2	26.4		
Sylhet	29.5	24.5	100	80

555 Lights band show in Ctg

Five of the country's most popular band groups enthralled music lovers of Chittagong at the two-day 555 Lights band show last week, says a press release.

Sponsored by 555 Lights of Bangladesh Tobacco Company Limited, sellout performances were held at the local Institution of Engineers August 8 & 9.

The performing bands were LRB, Dreamland, Winning and Feelings with Chittagong-based Souls bringing down the curtain.

Top officials of Bangladesh Tobacco Co Ltd, including marketing director, Francois Gillet, brand group manager, M. Jahangir Kabir and national sales manager, Harsh M. Dar, attended the concert along with the music lovers of Chittagong.

The concert, first of its kind in many years, drew huge crowds.

READ THIS AD AND DISCOVER WHY YOU'LL NEVER USE BLUE AGAIN.

New Ujala Fabric Whitener. The spotless way to get dazzling whiteness in your clothes

Ujala's New Scientific Fabric Whitener.

Age-old blue can never give you spotless dazzling whiteness because it forms sediments in water leading to dirty streaks and spots on your clothes. Ujala, with the power of V+ is a real and the only whitener which actually make your clothes look like new.

Dazzling whiteness never seen before.

Ujala's formulation contains the right balance of a scientifically researched

whitening agent along with a micro dispersion catalyst V+, so that it gets dissolved uniformly in water and is instantly absorbed by freshly washed clothes. Within seconds Ujala's special whitening power starts working. The result? Dazzling, never-before whiteness.

So, why put up with the spots and streaks of blue when you have the latest whitening wonder — Ujala Supreme.

For ultra-whiteness, which no Blue can match.

A STEP-BY-STEP GUIDE FOR USING UJALA

1. Make a pinhole on the inner lid of the Ujala bottle.
2. All you need is 4-5 drops per litre of water.
3. Immerse the washed clothes in the water.
4. Strain the clothes, wring for a few minutes and let them dry.
