# BGMEA demands further devaluation of Taka

By Staff Correspondent

The Bangladesh Garments Manufacturers and Exporters Association (BGMEA) has demanded further devaluation of Taka to compete with the garments exporters of the neighbouring countries.

"Our currency should be devalued in line with the neighbouring countries specially India and Pakistan to keep our Ready Made Garments (RMG) sector competitive in the world market, said Capt (retd) Anisur Rahman Sinha, the newly elected president of the BGMEA at a press conference held at a city hotel vesterday.

According to him, Pakistan and India have devalued their currencies by about hundred per cent during the last five years.

Newly elected first vice-president Alhai Khalilur Rahman second vice-president S U Haider, vice-president Benajir Ahmed and treasurer Mohammad Uzair Afzal FCA were also present at the confer-

Highlighting the problems

faced by the RMG sector which fetched 66 per cent of the export earnings last year, the BGMEA president said that about 600 to 800 small garment manufacturing units were going to be closed down due to the previous prolonged political impasse in the country.

On the other hand, the struggling factories could not keep pace with the requirements of buyers to make timely shipments which resulted in cancellation of orders, stock-lots and bank liabilities. Sinha said.

He said many factories which were once contributing to the national economy, were burdened with forced loans created by the banks due to cancellation of orders. These factories can not open new L/Cs because of their overdue loans, he

Demanding the formation of a special fund for rehabilitation of the factories badly af fected during the last political impasse, the BGMEA president

said that it could be created with the foreign currency fetched by the garment sector.

He also demanded allowing of EPZ facilities for the hundred per cent export oriented readymade garment industries established outside the EPZs. and establishment of Bonded Ware house facilities under private trading houses.

"To ensure supply of quality fabrics locally, conductve environment for investment should be created so that backward linkage industries could flourish within the next five years, Sinha said

In this regard he further said that to ensure increased use of local fabrics the 25 per cent al ternative cash benefit given to the fabric producers should be equitably distributed between the fabric producers and the apparel manufacturers and ex

Referring to our neighbour ing countries the BGMEA presi dent observed that the export earnings of hundred per cent export oriented readymade garment industry should be exempted from all sorts of taxes.

Sinha said the demand for garments from Bangladesh is increasing by 20 per cent on an average every year and the country will be able to retain it if the present political stability continues.

When asked to comment on BNP chairperson Begum Khaleda Zia's recent threat to wage a movement against the present government he said Begum Zia had already assured them of not taking up any political programme which might go against the country's economy.

Expressing dissatisfaction over the existing facilities at the Textile Cell of the Export Promotion Bureau (EPB). BGMEA president demanded establishment of an independent Apparel Board as the existing facilities at the EPB can not accommodate the recently increased work load of the apparel sector

### 'Govt pledge-bound to ensure equal development of all areas'

State Minister for Informa tion Professor Abu Saveed has said that the government of Sheikh Hasina was pledgebound to the people to ensure equal development of all parts of the country reports BSS.

The minister was addressing the annual general meeting of Daulatpur Thana Welfare Asso-

auditorium here Friday. ABM Anwarul Haq. Presi-

No ., m . wankan. Studique Rouf Khan and Phani Bhushan Biswas spoke on the occasion.

Prof. Sayeed criticised some opposition leaders for their undemocratic language and their conducts against the present government and said these political parties are making propaganda against the national consensus government under the leadership of Sheikh Hasina.

He said the present government has taken steps to build a strong local government.

He called upon the people to cooperate, with the government, irrespective of political affiliation, to build a strong local government to ensure development fulfilling national aspirations.

## Backward areas to be given priority in dev works,

says Faezul BARGUNA, Nov 9 : State

Minister for Jute and Textiles AK Faezul Haq has said back ward areas of the country will be given priority in implementing the development programmes, reports UNB. He was presiding over a dis-

trict rural infrastructure maintenance coordination committee meeting here on Fri-

Faezul Haq said government is determined to ensure welfare of rural people through sound and balanced development of rural infrastructure.

The meeting elaborately reviewed the projects taken under the special rural infrastructure maintenance in the rainy season and rural infrastructure maintenance (general) programmes.

The rural infrastructure programme includes road and embankment repair and maintenance, bridge and culvert construction, tree plantation, school, college, madrasa, temple, church repair and reconstruction.

Among others, parliament members Dhirendra Devnath Stambhu, Golam Sarvar Hiru,

"alchder and Were mesent. "itwut.

## ILO's six-day training opens

A six-day training on "Organizational Management and Accounts Keeping" (fourth batch) organised by the Internati ala Labour Organization de la "technologies for rural employment with special refere to women and suslevelopment" was inaugurat I at the cademy for Planning and De clopment at Nilkhet. in the city yesterday,

say a presi rele. se. Twenty four project beneficia les from two project locations in Khilpara and Sharifpur will participate in the training course between November 9-14.

Md Ashraf Ali, Director, Women's Affairs Department, attended the inaugural session as chief guest. He was appreciative of the efforts taken by the project to empower rural poor women through training on management and accounts

# Western zone's oil-based power plants incur huge losses

By Sharier Khan

The government is incurring heavy losses in the oil-based power plants in the country's western zone covering from Khulna to Dinajpur as it is subsidising up to Taka seven for per kilowatt of power generation there, according to a wellplaced source of the Energy Ministry.

While it costs only Taka 0.54 to produce one kilowatt hour of power by a gas-fired power plant in the eastern zone, it costs between Taka 5.50 and 7 for the same by an oil-based power plant in the western zone.

The country has an installed power generation capacity of 2900 MW but it actually generates 2100 MW maximum - leaving a shortfall of 200 MW de mand for power in peak hours. The power plants in the east-

ern zone, extending from Chittagong region to Sylhet region and Dhaka, mainly use natural gas as its main raw material to generate around 1900 MW

In contrast, the western zone, which lacks a gas supply network system-uses imported oil to generate around 200 MW

The power generation by the oil-based power unit in Barisal Khulna division has also become unpredictable since most of these units have become old.

To address the bleak power situation in the western zone the Power Development Board (PDB) has taken initiatives to install a 120 MW barge mount power plant near Khulna and another in the eastern zone.

According to a recent state ment of the Energy Minister. it would take another year to install and start supplying power to the grid. To build gas-based power

plants as well as to avail gas facilities to western part, the gov ernment has plans to install gas pipeline in the Jamuna Bridge. However, this bridge would not be completed before The government is also con-

sidering purchasing power from India to feed the power hungry eastern zone. The installation of the line can be completed and power can be connected to the main transmission grid within nine to twelve months, sources

pointed out. Since the price of power in the eastern India is much cheaper than that of the Khulna region, it would significantly help reduce the heavy subsidy expenditure of the government.

The Energy Ministry sources further said that the power purchase was not any substitute of expanding the power generation units by attracting private investment but it was supplemen-

On the face of severe power crisis and costly maintenance of power plants in the western zone of Bangladesh, the then BNP government sent a team of experts late last year to West Bengal to review prospects of power purchase. However, the move did not proceed further due to political unrest in the country.

The government has also made political commitment to set up a 210 MW power plant by utilising the Shahbazpur gas field in Bhola of the western zone. But to set up a power plant there and to build transmission network from the Bhola island to the mainland, a huge in vestment of 235 million US dollars is required. In addition, such a scheme would take at least five years to complete.

The 63rd Board Meeting of KAFCO and the 27th Board Meeting of KAFCO International Investment Company Limited were held at Sonargaon Hotel yesterday with the Company's new Chairman, M Akhtar Ali, Secretary, Ministry of Industries, in the chair.

# S'pore economy needs no drastic steps to arrest decline

SINGAPORE, Nov 9: Singapore confirmed on Friday that economic growth had slowed significantly but said it saw no need for drastic measures to arrest the decline, says Reuter.

"We are seeing a cyclical phenomenon as such, there is no need for drastic policies or measures. This is not 1985. It's a cyclical slowdown," an official from the Ministry of Trade and Industry (MTI) told reporters in a briefing.

Singapore underwent three consecutive quarterly contractions in 1985.

MTI said its preliminary 1997 growth forecast was at five to seven per cent as the external environment is expected to be positive.

Countries in the region are expected to record healthy growth. Global electronics demand next year is expected to

rebound. On Friday, MTI reported

Singapore's economy expanded by only 3.2 per cent in the third quarter against growth of 7.5 per cent in the second quarter of 1996. Slower growth was reported in all major sectors in Singapore for the third quarter.

Manufacturing contracted by 4.3 per cent against 6.5 per cent growth in the last quarter. due to a slowdown in the electronics sector, a weak global marine sector, and shutdowns and keen competition in the petroleum and petrochemical industries.

The financial and business sectors grew more slowly at 6.6 per cent against 7.1 per cent growth in the last quarter because of the sluggish performance of the stock exchange and slow growth in domestic

banking loans. The transport and communications sector expanded by 6.2 per cent against 8.5 per cent

The commerce sector grew by

growth a quarter ago.

a paltry 2.7 per cent against 6. per cent growth previously, due to a slowdown in the region's growth, weak re-export trade and lower visitor arrivals. MTI said growth in the con-

struction sector reached 13.6 per cent against 16.9 per cent growth in the last quarter.

The ministry said Singapore's manufacturing sector will probably remain weak in the last quarter of 1996 despite indications of a pick-up in US semiconductor orders and US demand for personal comput-

Electronics contribute 44 per cent to the country's manufacturing output. Sector's like construction and business services were expected to stay healthy. MTI forecast full-year 1996 growth in those sectors at about six per cent.

Analysts said that while the figures looked disturbing at first sight, there was little cause | and said the 600 had been tarfor concern.

#### 34pc ADB-funded Daily average turnover projects in Philippines of CSE tripples in Oct suffer delays MANILA. Nov 9: A joint re-From Nurul Alam view by the Philippines gov

CHITTAGONG. Nov 9: Amid a bullish run in Chittagong Stock Exchange (CSE) in the month of October, daily average turnover trippled while index

doubled compared with the previous month, according to official reports. In October. The daily average turnover recorded at Taka 85.96 million as against the daily av-

and market capitalisation

erage turnover of Taka 27.19 million in September The price index on October 31 closed at 1315.90 points while the index on September 30 at 694.99 points showing that it doubled in a month's

transactions Besides, market capitalisation at the end of October surged to over Taka 14.163 crore from Taka 7005 crore recorded one month back.

In October total transactions stood at taka 2063 million and floor trading took place for 24 days while in September total transactions recorded at Taka sistance resources." Del Rosario 680.1 million in 25 days floor trading.

CSE sources and market operators said the bourse in this port city had witnessed a boom in trading as new brand of investors continued to take interests in share business.

Prices of shares also jumped with the increase of investors in the market, they said. Market operators attributed

the tremendous rise in share prices to scarcity of share certificates. From the middle of October

the number of buyers of share increased rapidly though sellers were found very few in num-

Sources said some artificial crisis also was created in the market by a section of 'alleged manipulators) to mint money overnight out of the situation.

However, CSE started its journey on October 1995 with a market capitalisation of Taka 800 crore and price index at 385.43 points.

The daily average turnover recorded in October '95 at Taka 0.28 million only.

# Baropukuria power plant

## Tender suspended for making it cost-effective'

The Energy and Mineral Resources Ministry Friday termed a news item published in some newspapers during the past few days on the suspension of a tender for installing the coal-based Barapukuria power plant as misleading and "not based on facts," reports BSS.

In a handout issued here Friday night, the ministry said its decision to suspend and correct a tender notice for setting up the plant was not taken to serve any particular party's interest, rather it was taken to make the tender more competitive, flexible, cost effective and follow the provisions of "Power System Master Plan" formulated last year keeping in view the requirement of the power demand in 2015 and the transmission system in future, it

The handout said the international tender was suspended for correction and installation of the plant with a generation capacity of between 250 mega

watt to 300 mega watt in two units instead of the earlier tender inviting parties for installing 300 mega watt in two

The hand out said the initiative to implement the Barapukuria coal-based power plant was taken to meet the growing demand for power in the Western region, bring stability in power management and to properly utilise the coal, to be extracted from the mine.

The project, it said, was conceptually accepted at an ECNEC meeting held on December 26.

The handout said the Chinese government showed interest to implement the project under Chinese suppliers' credit during the Prime Minister's visit to China in September this

The decision to implement the project, it said, was given under the suppliers' credit scheme through inviting international competitive tender.

## Demand for oil to rise by 3 pc next yr: IEA

PARIS, Nov 9: World demand for oil next year will be 2.6 per cent greater than demand this year, the International Energy Agency (IEA) reported here yesterday and it said that OPEC output had exceeded 26 million barrels per day for the first time since 1980, reports AFP.

The IEA said that world demand for crude oil next year would amount to 73.7 million barrels per day on average, or 1.9 million barrels per day or 2.6 per cent more than the unchanged forecast figure for this

The agency, in its monthly report, increased its forecast for demand in the fourth quarter by 0.1 million barrels per day to 73.8 million barrels per day. It held its forecast of demand

in the first quarter of next year at 74.7 million barrels per day. It said that output of crude oil by the Organisation of **Petroleum Exporting Countries** (OPEC) had exceeded 26 million barrels per day in October for

the first time since 1980 owing

mainly to an increase of pro-

duction by member countries

outside the Gulf.

OPEC had produced 26.03 million barrels per day which was 997,000 barrels more than the quota ceiling of 25.0334 million barrels even though Iraq had not resumed export-Output had exceeded the fig-

ure for September by 90,000 barrels per day.

Indonesia and Nigeria increased their output strongly: Indonesia by 70,000 barrels and Nigeria by 50,000 barrels for a net gain of 95,000 barrels.

Venezuela, which frequently exceeds its quota, held its output steady. Production by Qatar had risen by 10,000 barrels per

But Saudi Arabia had reduced its output by 5,000 barrels per day and the United Arab Emirates had held its output steady. Output by Libya had

fallen by 20,000 barrels per day. The amount of oil being produced and the overshooting of quotas was likely to be at the centre of talks at the next OPEC conference to be held in Vienna on November 27.

Canadians keen

pressed keen interest of business communities of his country to invest in Bangladesh, reports BSS. High Commissioner Nicholas Hr Etheridge called on Finance Minister Shah AMS

Kibria at the latter's office at Bangladesh Secretariat yester-During the meeting they discussed matters of bilateral interest particularly foreign in-

vestment in Bangladesh. The Finance Minister apprised the High Commissioner of the reform programmes undertaken by the government in financial and judicial sectors in order to provide attractive opportunities to the investors especially foreign private in-

Kibria welcomed the Canadian business community to invest more in the energy and power sectors in Bangladesh.

They hoped that the friendly relationship existing between the two countries would further be strengthened in the day to

## US-Japan trade talks fail

GENEVA. Nov 9: United States and Japan have failed so far in their bid to resolve a dispute over access for imported goods in Japanese markets, a US trade official said Friday. reports AP. Two days of discussions in

Geneva under the auspices of the World Trade Organization failed to produce any agreement, the official said, He said no decision had yet been made it, or when, further

talks would be held. The United States has complained to the WTO that laws restricting the number of large stores, one of the best outlets for imported goods, as well as a series of other related laws, make foreign products hard to sell in

Japan. The complaint is the second prong of an attack by the United States on complicated rules and guidelines in Japan which Washington contends contrive to keep foreign goods out of the

Japanese marketplace. An independent WTO panel is already looking into whether Kodak Film Company has the same opportunities to sell its products in Japan as its Japanese counterpart Fuji.

The two sides have until Nov. 20 to resolve the dispute. If no progress is made the United States can request that the WTO set up a panel of judges to decide this matter as well.

2-day workshop begins at IPSA

A two-day workshop on "6th Annual Research Evaluation' began at the auditorium of Institute of Post Graduate Studies in Agriculture (IPSA) in Gazipur yesterday, reports UNB. IMED Secretary M Shahidul Islam inaugurated the work-

sentative of JICA in Bangladesh Morimasa Kanamaru attended the programme as special guest. Presided over by IPSA Rector Prof Dr Abdul Halim, the workshop was also addressed by the

workshop coordinator Prof Dr

shop while Residential Repre-

Ismail Hossain Mia. Scientists from different institutes including IPSA and Bangladesh Agriculture University took part in the workshop, said a press release.

## Call to ensure efficient food management

Speakers at a seminar yesterday underlined the need for ensuring food security as well as safe food for all classes of people of the country, reports

They said the issue of food security is important for Bangladesh, still a country of food deficit and where the natu-

ral disasters visit frequently. The speakers called for en-suring proper and efficient food management and prevention of any disruption in food security.

The food management seminar titled "Procurement, Movement, Storage and Marketing of Food Grains" was held here with Director General of Food Directorate Sirajul Islam in the chair. Food Secretary Abdul Hamid Chowdhury presided over the

Bhaban. The food secretary said each individual has a right to food and that is why it is very important to ensure safe food for all the people of the country through a proper food management system.

Describing the activities of

seminar held at the Khadda

the Food Department and the Food Ministry as very sensitive. Chowdhury said the decisionmaking process should be carried out properly and efficiently to remove the problems relating to procurement. movement, storage and marketing of foodgrains.
