# Over 15 lakh Khulna city dwellers deprived of civic amenities

KHULNA, Aug 1: Over 15 lakh city dwellers are being deprived of civic amenities due to various problems facing the country's third largest city, reports UNB.

Deplorable conditions of the city streets, scarcity of safe drinking water, unplanned drainage system, unhygienic toilets and latrines, lack of street lights, absence of parks. mushroom growth of kitchen markets, slaughtering houses and slums have made the city life vexatious.

There are some 700 roads, including lanes and by-lines, in the city. But it's horrible either to walk or drive vehicles on the roads as their conditions are more than dilapidated for lack

of maintenance. The city wears a flooded look during rain due to waterlogging although 35 kilometers of drains were constructed in last five years by the Local Government Engineering Department with the financial assistance of

the Asian Development Bank. Pedestrians cannot use the footpaths as those have been occupied by hawkers and a section of shopkeepers, including vegetable venders and fish

More worrying is the mushroom growth of slums which are believed to be the dens of criminals.

traders.

When asked about the city's development works, Chief Engineer of Khulna City Corporation Liakat Ali Sharif said 611 projects spending Tk 21.49 crore were implemented during the last fiscal year (1996-97).

The development works included construction, reconstruction and repair of 508 km roads at a cost of Tk 12 crore, construction and repair of kitchen markets, construction of culverts, parks, and drainage, costing Tk 9.49 crore. An ADB-assisted project to construct a 72-km drain and repair another 38-km drain is going on under the supervision

of the LGED executive engineer. KCC chief engineer said slum development works are also going on. Thirty latrines will be constructed and 30 deep tubewells installed in three slums of

the city. He, however, admitted that there are more than 100 illegal slums which are responsible for degrading the ecological balance of the city.
