Barisal residents face gas crisis

From Staff Correspondent BARISAL, Aug 18: Liquefied petroleum (LP) gas crisis is acute in all the southern districts of Barisal division.

Market sources say the crisis has been created by some dishonest and unscrupulous dealers taking advantage of short supply of gas, transport strike and continuous rains.

Samsul Arefin, Operational Depot Manager, Jamuna Oil Company, said that the recent crisis of LP gas was purely temporary as its regular supply had been reduced by only 10 to 15 per cent during last month. "It is not acute crisis or total suspension of supply from the company," he added.

Meanwhile, some unscrupulous doulers are selling a gas cylinder at Tk 300 to Tk 350 against the fixed rate of Tk 205. About 50 distributors of two

companies - Jamuna Oil Company and Meghna Petroleum are dealing in LP gas in the Barisal region, which includes Patuakhali and Jhalakathi.

It is alleged that one Barisalbased dealer appointed for Patuakhali does not distribute LP gas in his coverage area though the dealer lifts LP gas regularly from the depot.

The sources say cylinders cannot be sold in the market at all if supply remains suspended. Some non-dealer shopowners and traders are getting supply from Chittagong directly

and selling them at high prices. A proposal was earlier made to the local administration by the elites of the town, leaders of the 'Nagarik Committee' and the press to introduce 'card system for the LP gas consumers which is yet to be materialised. The system is working well in

Rajshahi, it is learnt. 2 more companies to operate: Dhaka-Barisal flights

From Staff Correspondent BARISAL, Aug 18: Two more private airlines are likely to operate on Dhaka-Barisal route by the end of this year.

According to sources, the Parabat Airlines and the GMG Airlines will put into service two small 19-or 28-seater air-

Meanwhile Aero Bengal Airlines, a private airlines, has been making regular operation on the route.

Parabat Airlines, according to sources has already made arrangements to buy or hire two 19-seater aircraft from

Czechoslovakia. The aircraft are likely to land in Dhaka by October next. GMG is also making contacts with Bulgaria and Germany for 28-seater

aircraft Meanwhile, Parabat has sent some crews and pilots of the airliner to Czechoslovakia for training. Formal route-checking with

the permission of the Civil Aviation Authority. Bangladesh (CAAB) may take place by late October.

The flight operation is likely at any time in November. The two airlines are likely to operate five domestic services in the country.

Besides, Aero Bengal Airline's two flights a day with 48seater Kazakh aircraft and Bangladesh Biman, the national flag carrier with ATP aircraft is operating a single flight on Barisal-Dhaka route on Sunday only.

EU fish ban

Quality control still remains a problem

Star Business Report

Some 18 months after the EU called for improvement, the Department of Fisheries has not been able to develop its

quality control mechanism. An EU mission, meanwhile. found testing facilities were far behind the required mark. In December 1995, EU inspectors suggested the government improve its mechanism such as laboratories and inspection procedures to comply with the EU health and hygiene rules.

The Department, despite repeated reminders from Brussels, failed to upgrade its inspection and quality control methods.

Mohammad Liaquat Ali, Director General of Fisheries. however, said fund constraints were a barrier to ensuring the EU standards. He said the Department failed to obtain approval several times when such requests were made with higher authorities.

Findings of an EU mission portray a near pathetic state of affairs. The report was sent to the government last June.

The laboratories, in Chittagong and Khulna, were found in bad shape. The one in Chittagong, according to the mis-

Minister warns against cheating jute growers

State Minister for Jute and Textile A K Faezul Haque has warned that irregularities in procurement of jute would not be tolerated, says UNB.

Addressing a high-level meeting on jute purchase at the BJMC headquarters on Sunday. the minister directed the offi cials to keep sharp eyes on jute purchase so that the farmers cannot be harassed by "faria" and middlemen.

He asked all concerned to buy jute directly from the growers at fair price and strictly follow the rules and regulations of jute procurement.

The jute minister said arrangement has been made for disbursement of adequate fund to buy jute and directed the officials concerned to distribute the money soon after the disbursement from banks.

Normal gas production in Narsingdi resumes

Normal production in the Narsingdi (Belabo) gas field resumed yesterday, a release of the Energy Ministry said here. reports BSS

The gas flow was disrupted on last Wednesday when a subsurface safety valve suddenly went out of order in the gas field

Normal operation in the gas field will solve the problem of reduced power generation in different power stations which depend on gas from this field, the release added.

Citibank holds seminar on forex trading

Citibank NA Bangladesh arranged a Foreign Exchange Trading Simulation Seminar for the Corporate Finance Managers.

The second of its kind held in Bangladesh, the first one was also organised by Citibank, says a press release.

The training programmes simulates a real life trading environment which allows the participants to learn the basics of foreign exchange trading. The training was held at Dhaka Sheraton Hotel for the last two

days. "Understanding the movements of currencies and taking appropriate decisions at the right time is the essential part of foreign exchange exposure management, it said. Markets are becoming more and more integrated due to interdependence of trade and commerce between nations. Today's Corporate Treasurers/Finance Managers are finding it more crucial to comprehend the fundamentals of foreign exchange market dynamics.

With a view to contributing towards this goal, Citibank is sharing its globally recognised skills in foreign exchange by organising this two-day train-

A total of 23 participants from leading Corporate houses from Dhaka and Chittagong participated in the seminar.

Textile mill-owners and a section of garments exporters

have given conflicting views on Bangladesh's seeking a "twostage derogation" for knitwear from the European Union. Anisur Rahman Sinha, president of BGMEA Forum, a group

opposed to the current leadership, yesterday supported the move, while Bangladesh Textile Mills Association (BTMA) interpreted it as something that had led to the crisis. Sinha also criticised BG-

MEA president Mostafa Golam Quddus's statement at a press conference last week that knitwear exporters could try to find markets other than the EU countries. "Such unprofessional state-

ment would be suicidal and total damaging for the garment sector and for the country as a whole," Sinha, a past president of BGMEA, said.

BTMA leaders backed Quddus' position against cancellation of disputed GSP certificates. "The BTMA extends its fullest support to the views of BGMEA urging the government not agree to cancellation. BTMA Chairman Mohammad Shahjahan said.

"It appears to BTMA that the question of cancellation of the disputed GSP certificates only arose when the government sought derogation of rules of origin from European Union

give different views on GSP Star Business Report for knitwear items. The EU is

taking advantage of Bangladesh on account of its approach for derogation from three stages to two stages in respect of knitwear exports to EU countries," Shahjahan said.

BTMA, rival BGMEA group

He urged the EU to allow Bangladesh exporters to continue a three-stage transformation (from cotton to yarn, yarn to fabric and fabric to ready-towear products) to help build backward linkages.

"Over 60 per cent of Bangladesh's export goes to the EU market and this long established market cannot be written off," Sinha said.

He said such statement of "shifting market from the EU to elsewhere is motivated and an effort to divert the attention of BGMEA members from the present burning GSP problem." Sinha urged BGMEA leaders

to take "positive steps" to resolve the GSP issue soon so that the knit exporters could enjoy GSP facility by doing a twostage transformation. The Forum leader, who was also present at the press conference Thursday, did not say anything to the press

Shahjahan of BTMA supported Guddus on shifting the market. "BTMA strongly believes that Bangladeshi textile exporters can occupy a fare share of the global market if the government gives further effort.

Duty free entry may be possible into many East European countries, the Baltic States, CIS countries and even countries in

US to develop solar industry

NEW YORK, Aug 18: The United States aims to increase the number of solar industry employees to 70,000 by 2010 from some 12,000 now, industry sources said, reports Xin-

The goal is in line with the Clinton administration's scheme to put a million solar systems on the roofs of commercial and residential buildings by 2010.

As the leading producer of solar energy in the world, the US put out 38.9 megawatts in 1996, sharing 44 per cent of world production of 88.6 megawatts, followed by two other major producers - Japan and Europe, the industry publication reported.

The government has invested some 1.5 billion US dollars in the solar industry in the past 25 years and is continuing to encourage the use of solar cells to decrease gases omitted from burning of fossil fuels.

Experts see light ahead for SE Asia's currency

HONG KONG, Aug 18: The proud economies of Southeast Asia, buffeted by turbulence since they surrendered their currencies to market foreces, may have only a short period of pain yet to endure experts say. reports AFP.

Governments that have come to view currency stability as the foundation for long-term growth have had a nightmarish

Singapore's central bank intervened Friday after the local dollar tumbled 1.5 per cent to 38-month trough against the greenback, and Malaysia did likewise, after the ringgit slumped six per cent to a 24year-low of 2.8250 to the US currency.

The rupiah sank 6.6 per cent to another nadir only a day after it was floated by the Indonesian government, while the Philippine peso, after brief period of strength, weakened by 1.1 per cent.

Thailand's baht slipped to 31.795 to the dollar from 31.300, down more than 22 per cent from its value prior to the July 2 float that triggered a domino effect among currencies around the region.

But analysts say the volatility and parallel turbulence in several equity markets, may be short-lived, provided governments and corporations alike adjust quickly to the new era of floating rather then managed currencies.

"This may temporarily have an effect on sentiment, but it really shouldn't be an issue," said Deep C Kapur, chief regional strategist with Salomon Brothers in Singapore. "It's a return to economic ra-

tionalis that is winning the day. I don't see this as gloom and doom, frankly." Desmond Supple, head of

Asian currency research at BZW in Singapore said the move to floating currencies was "a welcome dose of reality." Unless they have a huge war

chest on which to draw, central banks that persist in fending off a relentless speculative attack are eventually forced to increase interest rates, thus damaging the domestic economy, he

In the new epoch, the biggest

challenge for companies. economists said, is to avoid the crunch that comes when borrowings or other commitments are in yen or US dollars but the means of paying for them are in a fluctuating local currency, such as the rupiah. The theory that fundamen-

tals are the best defence will fund it greatest test in Hong Kong, the jewel in Southeast Asia's currency crown and the region's freest and strongest economy. Hong Kong is quite different

from most of its Southeast Asian neighbours, said lan Parkin, economist at the Hong Kong General Chamber of Commerce. This is because it service-

dominated economy is less vulnerable at a time of currency crisis than those which are based on manufacturing, where governments are tempted to carry out competitive devaluations in order to keep exports up, he said. The Hong Kong dollar came

under some pressure Friday. But speculators are likely to find the tiny but wealthy territory, with 82 billion US dollars in reserve and backed by China, with 121 billion, will be a tough nut to crack.

"It's a very different prospect from the Philippines, with 11 billion in reserves, or Malaysia, with 25 billion," said Andrew Fung, head of capital markets at Commonwealth Bank of Australia here.

SAARC air service Three-day meet in city from Aug 27 All seven member countries

of the SAARC will hold a threeday meeting in Dhaka from August 27 to discuss the introduction of air services interlinking the South Asian capitals, reports UNB. State Minister for Civil

Aviation and Tourism Dr Mohiuddin Khan Alamgir will inaugurate the meeting, officials Senior civil aviation offi-

cials and executives of the national airlines of SAARC countries will participate.
