Wage dispute in India

Federal employees call off strike

NEW DELHI, Sept 12: Four million federal workers called of an indefinite strike planned for later this month after the government agreed to raise their salaries by 40 per cent. trade union leaders said Friday. reports AP.

The agreement must be approved by the federal Cabinet. "We declare this strike is off," said Muramal Purohit, a negotiator, for the employees. Purohit heads the National Railwaymen's Union represent-

ing 1.6 million workers. The government and the workers reached the agreement Thursday after month-long negotiations over the salary raise recommended by a pay commission set up by the government after a gap of 10 years.

A government worker will now be paid a minimum salary of 3,450 rupees (96 dollars) as compared to 2,540 rupees (70 dollars) in the past. The increase will cost the government an additional 1.42 billion dollars in one year across India, The Observer newspaper said quoting finance ministry offi-

KURIGRAM

Mushroom growth of brickfields threatens habitat

From Our Correspondent KURIGRAM, Sept 12: The brick manufacturing enter-

prises have mushroomed all over the district posing a great threat to environment and soil fertility here. Local sources say about

15000 acres of cropland are being used for manufacturing bricks, and the manufacturers are using trees indiscriminately as firewood.

Farmers say agricultural productivity around the brickfields has declined in recent years due chiefly to loss of fertility of croplands.

They alleged that they are compelled to mortgage their lands to the brickfield owners as farm production has been on the decline.

However, the manufacturers say they use trees as firewood as price of imported coal is much

highers a size is not a reason asset Meanwhile, soil fertility is declining rapidly in the district due to rampant use of chemical fertiliser, particularly urea.

According to sources, the use of cowdung is essential for increasing land productivity but it is not used proportionately because of reduction in the number of cattle in the district.

India to get \$1b loan to modernise coal mines

NEW DELHI, Sept 12: The World Bank and Japan's EXIM Bank will provide a 1.06 billion dollars loan to modernise nine state-run coal mines in India, Coal Minister Kanti Singh said yesterday, reports AFP.

The World Bank sanctioned 530 million dollars on Tuesday while an equal amount would come from the EXIM Bank in October, the minister told economic editors here.

The total cost of the project. which seeks to expand the capacity of nine mines and replace equipment in another 15 mines belonging to the stateowned coal India Ltd, will be 1.69 billion dollars.

The remaining 635 million dollars will be raised by coal India, the minister said.

After the implementation of the project, the availability of coal in India by 2002 is likely to increase by 25 million tonnes annually, she said, although there will still be a demandsupply gap of 66 million tonnes.

Dollar rises against yen in Tokyo

TOKYO, Sept 12: The dollar rose against the yen on Friday, reports AP.

The gloomy economic data and technical buying of the US currency sent the dollar higher against the yen.

Also supporting the dollar was the yen's relative weakness against the German mark as traders focused on the widening gap in economic fundamentals

between Japan and Germany. Finance Minister Hiroshi Mitsuzuka's comments Friday that Japan record-low interest rates are "still a plus" for the nation's economy encouraged

yen selling, dealers said. Japan's key lending rate, the official discount rate charged by the Bank of Japan for loans to commercial banks, now stands at a record low of 0.5 per

cent.

Lower interest rates tend to make a nation's currency less attractive to investors.

The dollar rose reaching 120.69 yen at midafternoon in Tokyo on Thursday and was also above its late New York

level of 119.58 yen overnight. The yield on the benchmark No 182 10-year Japanese government bond fell to 1.990 per cent from 2.025 per cent Thursday, driving its price up to 106.96 yen from 106.70.

three issues remained un-

volume, fell by 15 per cent and 16 per cent in terms of value on that day.

The week started with an upward trend, and it registered a 51-point rise on Sunday, the first trading day of the week. Three new issues began trading on that very day when DSE's market capitalisation surged by Tk 486 crore. The three new issues are Uttara Finance. Samorita Hospital and Rose Heaven Ball Pen.

All Securities Price Index at Chittagong Stock Exchange rose by 27.48 points, ending at 374.90 on Thursday, the closing day of the week, from previous week's 347.42 points.

The market capitalisation of the CSE increased by Tk 552.95 crore, surging to Tk 5944.75 crore from Tk 5391.68 crore.

The CSE major market indicators also showed upward trend everyday save for the second day of the week when the price index declined slightly. But in the later part of the week, the CSE index went up again and made good the loss.

Meanwhile, the SEC, the

government's regulatory body for the capital market, was locked in a debate while introducing an unilateral form of trading in the two stock exchanges. As the DSE authorities have been demanding netting system for share settlement like CSE, the SEC formed a fivemember committee to look into the matter and to make recommendations. The committee comprising members from both the exchanges held a number of meetings and submitted reports to the SEC chairman.

The DSE council body approved the proposal of new system where shares will be settled twice a week, and the CSE council body will meet soon for taking a decision.

Insider sources say with continuous upward trend in both the bourses, the foreign investors who left the country after a massive price fall at the end of last year have started showing interest again. "If the market continues to surge, the foreign investors may come again" said a leading broker who has good connection with foreign portfolio investors.

TOKYO, Sept 12: Three days of US-Japan talks on reducing the overmanagement of trade in Japan ended Friday with the United States demanding concrete results and Japan saying its reforms are its own business, reports AP.

A US officials had announced after the first day that trade relations are worsening because Japan continues to sell more in the US and other foreign markets without substantially easing barriers in its own markets.

On Friday, the Japanese official acknowledged that reforms are necessary, but added that although Japan welcomes opinions from the US negotiators, the implementation of its deregulation plans is Japan's own responsibility.

He said Japanese negotiators also brought up US anti-dumping practices and US government "buy American" procurement policies.

The official, who spoke on condition of anonymity, said "buy American" policies at the federal, state and local levels prevent sales of some Japanese products. Steel used in construction and rail and mass transit cars have been cited by others as examples.

During the three days of talks that began Wednesday, separate groups discussed Japanese laws like the one designed to protect small retail stores from competition by larger ones.

Unemployment claim falls

WASHINGTON, Sept 12: First-time claims for jobless benefits fell by 14,000 last week to the lowest level in a month, says AP.

The Labour Department said Thursday that newly laid-off Americans filed a seasonally adjusted 310,00 applications for unemployment benefits, down from a revised 324,000 during the week ended August

The latter total initially had been estimated to be 326,000. It was the lowest level since 304,000 claims were filed during the week ended August 2. Many analysts had expected claims to dip by just 1,000.

Bond prices fell after the release of the report, pushing up yields on 30-year Treasury bonds to 6.68 per cent Thursday morning from 6.65 per cent late Wednesday. Analysts said the large drop was due partly to the Labour

Day holiday, which meant fewer days in which to file claims. But they also contend the robust economy continues to create jobs and shrink unemployment rolls. The department reported last week the jobless rate was 4.9 per cent in August, near a 24-year low. Although the

49,000 new jobs created during the month was the fewest in nearly a year, the sparse growth reflected the fallout from the United Parcel Service strike. Indeed, the four-week moving average of new weekly jobless claims fell 1,750 to

324,000.

Thai firm sells stake in Yangon Airways

YANGON, Sept 12: A Thai company has sold its stake in a Myanmar joint venture airline to a private Myanmar company. state-run newspapers reported Friday, reports AP. Krong Sombat Co sold its

shares in Yangon Airways Ltd to the May Flower group, a private Myanmar business concern with interests in the banking, construction, real estate and hotel sectors. Yangon Airways Ltd was es-

tablished in October last year as a joint venture between stateowned Myanmar Airways and Krong Sombat Co to fly domestic routes. Since 1988, when Myanmar began moving from a socialist

Japan's economy shrinks

TOKYO, Sept 12: As consumers cut spending after a tax increase in April, Japan's economy contracted at an annual rate of 11.2 per cent in this year's second three months, the government said Thursday, reports AP.

Officials and analysts, however, saw the shrinkage as an unusual occurrence, linked to the tax rise, and not a sign that Japan's economic recovery was in trouble.

Real gross domestic product fell 2.9 per cent in the second quarter from the first three months of 1997. It was a sharp turnaround from January-March, when GDP had been 1.6 bigger than in the previous quarter — a 6.6 per cent annual growth rate.

This was the first time GDP had contracted from the prior quarter since April-June 1996 and marked the worst shrinkage since the first quarter of 1974, when Japan's economy, reeling from the first middle East oil shock, declined 3.4 per

Real GDP discounts inflation and, by excluding often volatile net inflows of income from abroad, is considered a more accurate picture of Japan's economy than gross national product, the total output of Japanese goods and services.

Compared with the previous quarter, real GNP declined 3.0 per cent in the second quarter, after expanding 1.5 per cent in the first quarter.

Shimpei Nukaya, deputy director of the Economic Planning Agency, which released the data, said the April 1 increase in Japan's consumption tax to five per cent from three per cent and other tax changes were the biggest factors weighing on the economy during the period.

The government also terminated two trillion yen (17 billion dollars) worth of special annual income tax cuts, which

had been in place for two years. Nukaya said the despite the second quarter figures, Japan's economic recovery is continuing and is expected to gather momentum in the second half of the year.

"Although the recovery has slowed, the overall picture hasn't changed," he said. He did acknowledge, how

ever, that the decline was larger than expected and that it will be difficult to achieve the official government GDP growth rate forecast of 1.9 per cent for the fiscal year ending March 31,

Reflecting the tax increase, private consumption fell 5.7 per cent from the previous quarter to 278.79 trillion yen (2.35 trillions dollars).

Japanese banks take first six places in Asia

HONG KONG, Sept 12: Japan's Bank of Tokyo-Mitsubishi has become the largest commercial bank in Asia, with assets of 719 billion US dollars in the fiscal year ending March, the Hong Kong-based weekly Asiaweek said yesterday, reports AFP.

Bank of Tokyo-Mitsubishi, formed by the merger of Mitsubishi Bank and Bank of Tokyo in April 1996, has dethroned last year's front runner, Tokyo-based Dai-Ichi Kangyo, which slipped to third place with 464 billion dollars in assets, the weekly said in announcing its annual Asiaweek financial 500.

Another Japanese Bank, Sumitomo Bank, filled the number two spot with assets of 492 billions.

Japanese banks took the first six places in the 500 leading financial institutions in Asia as compiled by Asiaweek, followed by industrial and Commercial Bank of China, the largest Asian financial institution outside Japan, having as-

sets of 437 billion dollars. Banks in China, including Hong Kong-based the Hong Kong and Shanghai Banking Corp. view with the Japanese in size, taking five of the first 15 slots in the 500, Asiaweek said in a statement

Hong Kong and Shanghai Banking Corp. topped the profit rankings for the third year in a row, with net profit, rising 15.8 per cent last year to 2.47 billion dollars. The next three places also

went to the same institutions as in 1995 and 1996. National Australia Bank was second, with a profit of 1.67 billion dollars, up 6.8 per cent, and Hang Seng Bank, a Hong Kong and Shanghai Banking Corp subsidiary, was third. Its profit rose 6.3 per cent to 1.09 billion dollars.
