Mar 19th at 10:00 pm on Star Movies
The Craig/Bentley murder case of 1952, upon which this film is based, is one of the most notorious in British legal history, one that created a furore in its own time and aroused the conscience of millions on the subject of capital punishment. After a policeman was shot dead, two boys stood accused of the murder. The verdict—and the sentence passed on them—were to be as controversial and shocking as the crime.

SPEECH ACTS
AN ESSAY IN THE PHILOSOPHY OF LANGUAGE

Author: John R Searle
Publisher: Cambridge University Press
Price: Tk 775/-

This small but tightly packed volume is easily the most substantial discussion of speech acts since John Austin's How to Do Things With Words and one of the most important contributions to the philosophy of language in recent decades.

This book has immediately, and justly, been accorded the status of a major contribution to the philosophy of language. The brilliant but programmatic insights of Austin's How to do Things With Words are systematically developed and integrated with the more recent work of philosophers such as Grice, Rawls and Searle himself to produce an apparently comprehensive and certainly illuminating general theory, summarised in what Searle terms the "main hypothesis" of the book, "speaking a language is engaging in a rule-governed form of behaviour."
