DHAKA WEDNESDAY, MARCH 25, 1998

## Chilean chosen as new ILO chief

GENEVA, Mar 24: The International Labour Organization yesterday chose Juan Somavia of Chile as its new chief to succeed outgoing director general Michel Hasenne, a statement said, reports AFP.

Somavia secured 44 votes from the ILO's 56-member governing body, beating Maria Nieves Confesor from the Philippines, who won 12 votes and was the only other candidate for the top job. Somavia, 57, was expected to

win the race since he had the backing of the United States and several European countries. He will take up the post in March 1999, when Belgium's Hansenne, who was re-elected to a second five-year term in 1994, steps down.

Somavia is currently Chile's permanent representative to the United Nations in New York and led the Chilean delegation as non-permanent Security Council member in 1996 and

Considered an effective diplomat, he won praise for organizing the UN social summit in Copenhagen in 1995.

Fluent in Spanish, French and English, Somavia has acted as consultant for various financial, development and trade organizations including the UN Conference on Trade and Development and the General Agreement on Tariffs and

### Scarcity of TSP, SSP

# Urea price stable in northern region

NAOGAON, Mar 24: The price of urea fertiliser during the current Irri-Boro season remains stable in the 16 northern district including Noagaon. reports UNB.

Sources said urea fertiliser is being sold for Tk 280 to Tk 300 per 50-kg bag as the stock is satisfactory in the region.

But the farmers are facing severe scarcity of TSP and SSP fertilisers which are most essential for the Boro crops.

Local farmers said the supply of TSP and SSP is much lower than the demand and prices are also higher. A 50-kg bag SSP is being sold for Tk 700 to Tk 800 and TSP nearly for Tk

According to a reliable source, TSP and SSP production in Bangladesh can hardly cope with the one tenth of the total demand. Hence, the farmers are to depend on the imported TSP and SSP fertilisers.

But the dealers are found reluctant to lift their allotted quota of the imported TSP and SSP fertilisers as the cost is comparatively higher than the indigenous one. As a result, the shortage of TSP and SSP is acute in the northern region.

The government has imported Di-Ammonium Phosphate (DAP) equivalent to TSP and SSP during the current season. But the dealers are reluctant to market the new fertiliser which is quite unfamiliar to the farmers. As a result, government initiative is facing a setback.

# **REB** efforts praised in US

America's National Rural Electric Cooperative Association (NRECA) during a conference held recently in Tennesse, USA, gave high marks to the efforts of Rural Electrification Board (REB) in Bangladesh in reaching electric power to the doorstep of the people in far flung areas, reports BSS.

While appreciating the good work of carrying out electrification programme in the country. NRECA's annual meeting had stated that the "success and effectiveness of Bangladesh's cooperative model has gained international recognition," a press release said.

Brigadier MA Malek, Chairman of Reb, joined former US Joint Chief of Staffs General Colin Powell in addressing the members of NRCEA at its 56th annual meeting which ended on March 11.

#### Cummins Wartsila gives presentation on gas engines

Cummins Wartsila, a joint venture between two large multinationals, Cummins Engine Company of USA and Wartsila NSD from Zurich, gave a presentation at a city hotel on Monday.

The seminar gave an introduction to the Joint Venture and the new range of gas engines that is being introduced in Bangladesh by Beximco, says a press release.

Cummins and Wartsila pooled together their technological expertise to develop the most modern and fuel efficient range of gas and diesel engines. The gas engines will be available from 1.2 MW to 3.2 MW whereas the diesel engines are

upto 35 MW. These engines are available in standby mode for peak shaving and on base load for continuous duty application.

Stock exchanges will have own committees to regulate

# SEC sets new limits for price fluctuations

Star Business Report

The Securities and Exchange Commission has withdrawn its much-debated 10 per cent flat rated "circuit breaker" earlier imposed on share prices of both the Dhaka and Chittagong Stock Exchanges, putting in place a new system of control on price fluctuations.

The SEC has come up with new guidelines under which upward and downward price limits of a stock would be determined by the stock exchanges themselves, the SEC announced yesterday. The new rules will take "immediate effect".

A committee styled "Share Price Movement Regulating Committee (SPMRC)" to be formed by the stock exchanges will act according to the guidelines. Only stock Exchange officials, not the members, would be on the regulating committee.

The SEC, whose negligence was partly blamed for share market crash in November 1996, also said the fresh guidelines were part of capital market reform programmes financed by the Asian Development Bank.

Previous day's per share market price	Limits			
Upto Tk 200	20% but not exceeding Tk 35			
Tk 201 to Tk 500	17.5% but not exceeding Tk 75			
Tk 501 to Tk 1000	15% not exceeding Tk 125			
Tk 1001 to Tk 2000	12.5% not exceeding Tk 200			
Tk 2001 to Tk 5000	10% not exceeding Tk 375			
Tk 5001 and above	7.5% not exceeding Tk 600			

previous day's market price applicable for each market day: 2. In case of new issue, trade may be allowed for first five consecutive market days, and after that above limits will be applicable.

3. In case of receipt of any price sensitive information like rights issue, bonus issue and dividend from the listed company, free trade may be allowed for subsequent three consecutive market days, and after that above limits will be applicable.

4. In case securities not traded for previous consecutive 30 market days, free trade may be allowed for subsequent three market days, and after that above limits will be applicable.

5. The SPMRC shall refer to the Disciplinary Committee of the stock exchange any bid, offer, transaction, if deems to be an anomaly, endorsing a copy thereof to the SEC. 6. The stock exchanges shall ensure compliance with these

7. The above guidelines may be reviewed by the Commission from time to time in order to ensure orderly markets and also to address the practical aspects.

"During 1995-1996, the Dhaka Stock Exchange had own circuit breaker system which was also withdrawn by DSE in mid 1996. But the modalities of the system and reason for withdrawing the same were not known to anybody else," the SEC said in a statement. "Subsequently when the share prices on DSE were soaring irrationally the Commission had to direct the stock exchanges to impose circuit breakers in October 1996 in the public interest at existing flat rate system which has now been with-

# MCCI condemns public disclosure of loan defaulters' names

The Metropolitan Chamber of Commerce and Industry (MCCI), Dhaka in a statement yesterday condemned the disclosure of the names of bank

Sangsad. It also urged the government to ensure that such public disclosures are avoided in the fu-

loan defaulters in the Jatiya

The organisation also strongly urged that the central bank's directives for suspension of credit facilities to any firm having relationship with another firm with classified loans be withdrawn immediately.

"The disclosure amounted to breach of confidentiality which should exist between a bank and its clients and also because in several cases, the names of borrowers have been incorrectly mentioned as defaulters, the statement signed by MCCI President Laila Rahman Kabir said. "We feel that such lapses are regrettable and will not help the morale of the business community in the prevailing difficult business conditions."

The MCCI observed that firm measures to recover the overdue loans should be taken based upon bank-client relationship. It also suggested grouping the

Star Business Report

defaulters into four categories : a) borrowers who have not invested the loans in the concerned projects, b) borrowers who invested in the relevent projects which are operating profitably, but loans are not being repaid, c) borrowers who have duly invested loans in the projects, but the projects ran into difficulties and are not in a position to repay the loans and d) borrowers who have duly invested the loans but the concerned projects ran into temporary financial problems for genuine business difficulties, but will be in a position to recoveer, given fiscal, tariff, credit and other policy support

from the government. The chamber suggested that those falling into category (a) and (b) are wilful defaulters and that punitive actions must be taken against them.

But the other two categories deserve to be treated differently, MCCI maintained.

It said the rising trend of defaulting suggest something fundamentally wrong in the selection of borrowers, loan apprisal procedure, monitoring system, and overall portfolio management in the banks.

" Deterrent actions against the delinquent borrowers alone

will not, therefore, solve the bank problems," it said.

" It is in the national interest to ensure that while tackling the problems of overdue bank loans, the country's trade and industry are not harmed," the statement said.

The MCCI also criticised the Bangladesh Bank's directives under which credit facilities remain suspended to any individual/firm having relationship with another firm/enterprise with classified

" This has caused immense problems to industries which are already in operation. They are turning into sick enterprises for lack of credit facilities," it said.

The chamber suggested for forming a committee consisting of officials from finance ministry, Bangladesh Bank, and private sector representatives to review the orders regarding suspension of credit and to prepare fresh guidelines to help the banks recover overdue loans.

Bankruptcy cases should be filed against wilful defaulters while legal actions must be taken against the bank officials who are found guilty of having colluded with the wilful defaulters, it said.

#### SCB workshop on payment under CHIPS system held Institutional Banking, cor-

respondent banking arm of Standard Chartered Bank, organised a workshop on 'interbank payments under CHIPS system' for the foreign trade officials of Uttara Bank Ltd on Monday, says a press release. Geoff Williams, Chief Execu-

tive of SCB, Bangladesh while inaugurating the workshop focused on the training need of the customer banks to upgrade their skills in the line with modern payments system to face future challenges. The workshop was conducted

by Kanti Kumar and Towhid Islam. Thirteen officials from Uttara Bank Ltd participated in the workshop.

# BCIC incurs losses in 7 yrs, Tofael tells JS

Minister for Commerce and Industries Tofael Ahmed yesterday told the Jatiya Sangsad that the Bangladesh Chemical Industries Corporation (BCIC) had incurred losses for seven years and made profits for 14 years at different times since its establishment in 1976, reports

Inheriting huge loss of the corporation the government has taken pragmatic steps to minimise it and this year the loss would be less than before, the minister said in reply to a question from JP member Zinat Hossain.

The fourteen profit making years of the corporation were 1976-77, 1978-79 to 1985-86 to 1987-88, 1989-90, 1992-93 and 1993-94 while it incurred losses in 1977-78, 1986-87, 1990-91, 1991-92 and 1994-95 to 1996-97 financial years. Replying to a supplementary

from the same MP the minister

said there was no accountabil-

ity and transparency in the industrial sector during the past government. In this regard he referred to the KAFCO, which incurred huge loss every year. The KAFCO project in which the government owns 88 per cent share was initiated by the Ershad government and im-

ment, the minister said. Listing the causes of loss, the minister said the BCIC incurred a loss of Taka 2.05 crore in the year 1977-78 as the corporation took over the management of the already loss making Sylhet Pulp and Paper Mill of the

plemented by the BNP govern-

The BCIC incurred a loss of Taka 5.49 crore in the fiscal 1986-87 as it did not raise the prices of urea. TSP and newsprint keeping pace with

the production cost. The corporation incurred a loss of Taka 30.41 crore for not

increasing the fertiliser price keeping in view the production cost in 1990-91, Tofael said. Due to imposition of VAT on imported raw materials, gas price hike and implementation of new national pay scale, the BCIC incurred an approximate loss of Taka 50.40 crore in

suffered a loss of taka 55.87 crore because of reducing the fertiliser prices frequently, the minister said. The BCIC incurred a loss of Taka 117.78 crore as it reduced the prices of urea at the rate of Taka 100 per ton and the export

of urea was restricted in the fis-

1991-92, while the organisation

cal 1995-96. The corporation incurred a loss of Taka 246.80 crore in fiscal 1996-97 for reasons including the complete closure of the biggest facility of the corporation the CUFL, declining production in other urea fertiliser factories and buying of fuel oil at high price and reduction of urea price at factory level, Tofael added.

Responding to a supplementary from treasury bench Member Shahjahan Khan, Tofael said the loss mounted in fiscal 1996-97 as the BCIC fertiliser factories did not get timely and needed supply of gas resulting in production of four lakh 48 thousand 442 metric tons less than the target. The corporation would suffer an estimated loss of Taka 97 crore due to the problem, Tofael said.

The loss will be minimum and the BCIC fertiliser factories will be making profit once the Shangu valley becomes operative, the minister said.

In the international foreign exchange markets, US dollar was slightly lower against the Japanese Yen in early hours amid fears of intervention by Bank of Japan. However, later dollar gained above 130 Yen level. Against the Deutsche Mark, US dollar ranged above 1.82 range as market remains cautious ahead of the meeting of the European Finance Ministers due this weekend. Rise in oil price supported Pound Sterling's rise. At 1840 hours local time US dollar trade at 1.8280/85 DEM, 130.22/31 Yen and GBP at 1.6753/1.6760 USD.

#### Global export growth hits record high in'97 Much of the 1997 export increased its exports by 11.5 per terms, far below 1996's 11.5 per financial crisis will be felt most

WASHINGTON, Mar 24: Global export growth reached a near record in 1997, says the World Trade Organization (WTO), which warns that 1998 growth prospects "remain clouded" by the uncertainty over the impact of the Asian financial crisis, says USIS.

The WTO reported yesterday that the dollar volume of world merchandise exports grew 9.5 per cent in 1997, the highest rate of trade growth recorded in more than two decades, with the exception of 1994's 10 per cent growth.

A moderate slowdown in global economic activity is expected to cut export growth by two or three percentage points in 1998, which would still leave the level of global trade expansion above the rate recorded in the first half of the 1990s, the WTO said.

growth was attributed to strong economic growth in North America and South America; both regions recorded a higher share in world trade than they had attained in more than a decade, the report said. Latin America's 12.5 per cent export growth in 1997 followed an 11 per cent expansion in 1996. In North America, exports expanded by 10.5 per cent. Some slowdown in these regions is

expected in 1998, the WTO said. Export growth was 8.0 per cent in Europe in 1997 (nearly double the 1996 rate and led by export recovery in Germany. France, Spain, Ireland and Turkey) and 11.0 per cent in the transition economies, up from 7.5 per cent in 1996. While Asia's economic

growth slowed in 1997 com-

pared to 1996, the region still

cent — more than triple the 3.5 per cent 1996 growth rate. The WTO notes, however, that if exports are measured by

changes in the dollar value, reflecting the US dollar's sharp rise over the last year relative to many other currencies, world trade growth was much more moderate. The "dollar value" of exports

of merchandise and commercial services in 1997 reached a record \$6,590,000 million — \$ 5,295,000 million in merchandise and \$ 1,295,000 in commercial services, up three per cent and two per cent respectively, from 1996 levels. In the Middle East, the dollar value of exports stagnated as

crude oil prices fell by six per

cent on average in 1997. In

Africa, export earnings rose

three per cent in dollar value

cent growth, reflecting lower commodity prices for most non-beverage food items. As in the past, worldwide

trade in manufactured goods expanded at a rate above total merchandise trade growth. Among the three broad sectors of commercial services, growth of transportation stagnated, travel services grew slowly and other commercial services recorded above average rate of export growth, the report said. The WTO further reported

that for the first time since 1994, North America's imports. grew faster than exports. US exports as a share of global exports reached 13 per cent, the highest level since 1970. US imports, however, were 16.5 per cent of the total, the highest level in a decade.

The trade effects of the Asian

gion, the report said. Because the affected countries — South Korea, Malaysia, Thailand, Indonesia and the Philippines account for a relatively small share of world trade (6-7 per cent), the impact of the crisis on aggregate trade is expected to be limited, the WTO said Within the affected coun-

severely within the Asian re-

tries, the higher cost of credit and of imported inputs for export production will hamper export expansion in the short term, it said. "It is probable that exports

from the five most affected Asian economies will accelerate in 1998, but perhaps not as rapidly as might have been anticipated as a result of the strong currency depreciations that followed in the wake of the financial crisis," the WTO said.
