Indian to head StanChart

LONDON, Jun 11: An Indianborn executive is to take over at the helm of Standard Chartered, a once-colonial British bank, becoming the first Asian to head one of Britain's top 100 companies, the Independent reported today, says AFP.

Rana Talwar, a 50-year-old career banker born and brought up in New Delhi, has spent most of his life with US international bank Citibank. He is to take over as chief executive of Standard Chartered next February, the London Daily

Talwar told the paper that to be the bank's first Asian head was "very pleasing", adding: "It also increases enormously my own sense of responsibility, to succeed in this new job."

Standard Chartered has of-fices in all parts of the globe formerly part of the British empire, and is especially strong in the Far East and Africa.

Talwar said he was keen to continue the bank's policy, introduced over the last 10 years, of "decolonising" its structure by replacing British management with local recruits.

London welcomes move to lift beef ban

LONDON, Jun 11: British Agriculture Minister, Jack Cunningham, yesterday welcomed moves to lift the European embargo on British beef and urged European officials to seek a speedy end to the ban, reports AFP.

"We shall certainly try to conclude the rest of the process as quickly as we can," the minister said.

He told the BBC, "This is very good news but it's not the end of the story and there could well be some tough negotiations yet."

Cunningham reassured beleaguered British farmers: "We shall be doing everything we can to minimise the time between this announcement and the final agreement for beef to flow into Europe again."

His comments followed a recommendation by the European Commission for a total

lifting of the two-year-old ban. EU veterinarians and other officials must ratify the EC recommendation, which could see

British beef back on the inter-

national market late this year.

Proposed budget for 1998-99

Capital market gets incentives

Star Business Report

The proposed budget for the 1998-99 gave a number of incentives to the country's ailing capital market.

The minister suggested steps to raise investment for primary and secondary markets. "No question would be raised for an untaxed investment in primary and secondary markets. If the investor pays a seven and half per cent tax, he would be allowed to enter the market."

To encourage floatation of private mutual funds the minister said " In order to stimulate the capital market, the minister proposed exemption of income tax from mutual funds. So far the Investment Corporation of Bangladesh (ICB) had been enjoying such exemption . The minister hoped the private mutual funds would be encouraged following the move.

Presently there exists two rates for corporate income tax for companies which traded publicly at the rate of 35 per cent. The ones which are not trading publicly were subjected to a tax of 40 per cent.

The banks, insurance companies and financial institutions, despite their public trading presently pay up taxes at rate of 40 per cent. With the

Two-pronged strategy on SOEs

To free the national economy from the burden of losses by the state-owned enterprises (SOEs), the government will continue its two-pronged strat-egy — closure of losing concerns and speedy privatisation, reports UNB.

In his budget speech, Finance Minister S A M S Kibria said losses of the SOEs have turned out to be a huge burden on the State and the country's banking system.

He said total loss of 18 nonfinancial state-owned corporations was estimated at Tk 1039.13 crore for fiscal 1997-98. Total accumulated loss of all SOEs, excluding the financial sector, stands at Tk 12357.1 crore.

The finance minister said operations in 11 mills of BTMC and four state-owned newspapers and periodicals have been suspended by paying due compensation to employees and workers.

About Tk 200 crore was spent for voluntary separation programme in FY 1997-98, he informed.

He said as the privatisation programme is very important for the future of the nation, new guidelines are being prepared for privatisation. Surplus land

of SOEs will be sold separately. The Privatisation Board has finalised arrangements for transfer of nine enterprises to the private sector this year, Kibria said

The net loss of the SOEs will, however, come down to Tk 686 crore by the end of 1997-98 from Tk 1412 crore in the previous fiscal year, according to the Economic Survey 1998 released today.

Six corporations under manufacturing sector (BTMC, BSEC, BSFIC, BCIC, BFIDC, BJMC) incurred a net loss of Tk 823 crore in FY 1996-97, which is estimated to come down to Tk 543 crore in 1997-98.

The net loss of five utility sectors (BOGMC, BPDB, DESA, Chittagong WASA and Dhaka WASA) was Tk 346 crore in 1996-97, which will decline to Tk 176 crore by the end of the current fiscal (1997-98), the survey said.

Asian stock markets tumble further

HONG KONG, Jun 11: Most Asian stocks tumbled further early Thursday as investors became increasingly worried about the weak yen, which fell to a new seven-year low against

The Japanese currency fell on the absence of yen-supportive comments at a meeting of finance officials from the Group of Seven industrialized nations, which ended Wednes-

day in Paris. Most Asian currencies were also dragged down by the Indonesian rupiah's plunge below the psychologically important level of 14,000 against the US

Sharp falls in share prices

"A lot of the direction in the market hinges on the dollaryen yen direction," said Andy Tan, a Singapore market specialist for Standard and Poor's.

In Tokyo, the dollar bought 141.76 yen, up 0.92 yen from late Wednesday in Tokyo, to a level not seen since early June, 1991. In New York overnight, the currency settled at 141.43

Traders said the dollar's rise was spurred by sharp falls in share prices in Japan and Taiwan, leading to safe-haven dollar-buying on rekindled fears of further financial turmoil in Asia.

Tokyo's benchmark 225-issue Nikkei Stock Average lost 274.77 points, or 1.79 per cent, moving to 15,064.49 at the close of morning trading, adding to Wednesday's 1.23 per cent-loss.

In Taiwan, shares ended at a five-month low as selling pressure from margin maintenance calls and concerns over the weak local currency dragged stocks down, analysts and traders said.

The Weighted Price Index of the Taiwan Stock Exchange closed 12.39 points lower at . 7,210.74.

morning as the benchmark index lost 3.1 per cent just minutes after the opening bell, hitting its lowest level since Feb.

But the Hang Seng Index later recovered on bargain hunting, closing the morning session just 1.1 per cent lower at 7,890.13 points. The index had lost 7.1 per cent over the last two days.

In Jakarta, the rupiah hit an early low of 14,850 to the dollar, a four-month low, but rose to 13,750 to the dollar in late morning. Jakarta share prices

In Manila, stocks and the Philippine peso both plunged.

The key Philippines Stock Exchange Index dropped 4.6 per cent to 1,829.02, its lowest level since January. The index has now lost 128.74 points over the past four session.

In Singapore, the key Straits Times Industrials Index dived 18.84 points, or 1.7 per cent, within 15 minutes of opening Thursday, continuing Wednesday's plunge.

But correction buying took over and the index shifted up and down through the afternoon, and was 0.25 per cent up in the early afternoon.

The Singapore dollar weakened further, hitting 1.74 to the US dollar. In Kuala Lumpur, shares

closed lower at midday on a weaker Malaysian ringgit and slumps in other regional stock markets. The key Composite Index was at 479.80 points, down 2.1

per cent. In Bangkok, the key stock

index was down 2.1 per cent to 286.05 points in moderate trading at midday on investors' worries over Thailand's deepening recession and the health of its financial institutions. The baht also fell against the US dollar.

New Zealand shares also fell for the 11th straight session. with the key index falling nearly 59 points, or 2.8,per cent. closing at 2,008.78 points.

FOR IMMEDIATE RELEASE

TRANSPACIFIC CARRIERS TO ADJUST CANADA RATES San Francisco, June 9, 1998 — Major ocean and

intermodal shipping lines operating in the trade lane from Asia to Canada will implement a second 1998 rate adjustment in that market, in order to help offset depressed rate levels, address severe cargo and equipment imbalances and ensure stable service.

Effective July 15, 1998, rates for all cargo moving on the vessels of carriers in the Canada Transpacific Stabilization Agreement (CTSA) will be increased by US\$ 200 per 40-foot container (FEU). Propórtionate încreases will be implemented at the same time for other equipment sizes and cargo otherwise rated.

CTSA noted that market conditions in the Asia-Canada trade have changed dramatically since Agreement lines adopted and announced an earlier increase in November 1997, to take effect last April. In recent months, the surge in container traffic from Asia through Canadian ports and the falloff in westbound shipments to Asia, have increased operational problems and costs relating to port congestion, routing of cargo and balancing equipment.

CTSA is a discussion and policy setting group of 12 ocean and intermodal carriers serving the trade from ports and inland points in Asia and the Indian Subcontinent to destinations throughout Canada.

Amex notes on Thursday's market The local interbank foreign exchange market was stable with strong dollar demand in the market. USD/BDT traded mostly within a range of 46.4700 to 46.4750. The call money market was slightly up. The call rates touched 13.50%, Thursday's highest. The average call rates

ranged between 11.50% and 13.50%. In the international market, US dollar increased its gain against the yen and briefly reached above 142 yen in the late Tokyo trade on Thursday. The yen was pressured by the fall in the Nikkei index and JGB (Japanese Government Bond) prices. Intensified selling pressure pushed the yen to reach 142.10 a

seven year high helped by speculative buying of dollars by overseas operators in view of depressed yen's undertone. Lingering concerns about the Japanese economy and problems with the banking system encouraged dollar buying. The dollar maintained its overnight upward biases against the mark and reached a six-week high level. Renewed worries for Russia wounded the mark, as Germany being one of the biggest investor in Russia.
