Speaker orders  
probe into  
allegation

By Staff Correspondent  
Speaker Humayun Rashid Choudhury has ordered a departmental enquiry into the allegations of Krishak-Khetmajur Sangram Parishad that he did not receive their memorandum on Thursday.

According to a press release issued by Parliament Secretary yesterday the Speaker said he was not aware of any delegation coming to meet him.

He had received a number of memorandum in the past and would have certainly accepted the memorandum on Thursday if he was aware of it. He would personally receive the memorandum of the Krishak-Khetmajur Sangram Parishad whenever they would like to submit it and urged all not to create any unnecessary controversy on the issue, the release said.

The enquiry has been ordered to find out "how the misunderstanding in this regard was created in absence of proper communication", the release added.

Law Secretary  
goes on LPR

By Staff Correspondent  
Aminullah, Secretary, Ministry of Law, Justice and Parliamentary Affairs went on LPR on June 23, according to official sources.

A proposal has been sent to the Prime Minister's Office for a two year contract appointment for him, the sources said.

None has yet been given the charge of the secretary of the ministry.

Khandaker Abu Bakr, additional secretary of the ministry is also scheduled to retire on August 28.

Aminullah was a joint secretary in the ministry when Awami League came to power two years ago. At that time, M Habibullah was additional secretary in charge under a contract appointment. His contract appointment was terminated and Aminullah was made joint secretary in charge of the ministry and subsequently promoted to the rank of secretary.

Aminullah belonged to the 1967 batch of the then East Pakistan Civil Service (Judicial Cadre).

OUR OWN PATENTED TECHNOLOGY  
AN APPEAL TO THE PEOPLE

We produce equipment to protect your appliances, but are you protecting us? In the proposed budget UPS (one with one computer) & Solar Photovoltaic Generators have been made duty and VAT free. On the other hand if we manufacture the same locally we have to pay 30% duty & 15% VAT for importing loose components, and again 15% VAT on sales. This is the same if we are to manufacture any other electronic product. IS IT JUSTICE?

Small industries like ours have to cross almost unsurmountable barriers to produce a product of local design & technology. Still we are succeeding in creating an infrastructure in the country for such self-dependence, particularly in the Electronics sector. Small Industries are the BACKBONES of a nation and we are striving to create this BACKBONE.

But how can we continue if your policies are against all this? PLEASE, REVISE YOUR POLICIES as follows:

1. Put up 30% duty & VAT on UPS & Solar Photovoltaic generators (except the panel which cannot be made here)
2. Make loose electronic components completely duty & VAT free.
3. Waive VAT on sales of electronic products made with local technology (you can assign country experts to assess any claim on this).

We are in the process of developing the technology of the above products completely indigenously. Unless policies are changed we have to consider turning ourselves a TRADER. Do you really want us to do that?
