Indian troops, militants in close combat in Kashmir

KARGIL, India, May 30: Indian ground forces Sunday pressed on with attacks against Islamic rebels in Kashmir, engaging them in close combat, and fought another artillery duel with Pakistan across the border, reports AFP.

India is still studying a pro-posed visit to New Delhi by the Pakistani foreign minister for peace talks on Kashmir, the subject of two wars since 1947 between the now nuclear-armed rivals.

The air force, which continued limited air raids on the guerillas following the latest ground attacks, Sunday vowed to avenge the killing of one of its pilots who crashed in Pak-

istan. "We are now attacking them at all fronts," Major General J.J. Singh, operations director, said in New Delhi in reference to a zone in Kargil district where hundreds of guerillas set up bases in an clandestine operation which began May 9. India says Pakistan army units are also there.

"We have pushed them back at all sectors," Singh said. "We do not have an estimate

2004 time allows, Jernigan and Barry will also wrap the US Unity module with a cover and check the antenna which allows it to communicate with the National Aeronautics and Space Administration mission control center here.

Once those tasks are completed, astronauts Julie Payette, a Canadian, and Valery Tokarev, a Russian, will start delivering some two tonnes of food, water, computers, spare parts and tools to ISS.

The NASA mission aims to prepare the space station for the arrival of its first occupants -two Russians and an American

in spring 2000.

Discovery's 10-day flight is the second of 36 shuttle missions needed to complete the 50-billion-dollar, 16-nation space station project over the next five years.

Construction of the ISS began in December and the docking with the shuttle represents a first major step forward for the station. Discovery's seven-member

crew succeeded without a hitch late Friday in intercepting the ISS in the first link-up between a shuttle and the orbiting out-

The spacecraft slowly maneuvered for more than an hour around the station's two modules as it prepared for the groundbreaking rendezvous. At an altitude of 400 kilome-

ters (250 miles) and a speed of 27,000 kilometers per hour (16,740 miles per hour), the delicate maneuver left little room for error.

"Houston, we have capture," shuttle commander Kent

Rominger said upon contact. The shuttle linked two tunnels to the space station, allowing astronauts to move freely between the two vehicles while they are joined over the next six days. Discovery heads back to Earth on highers NASA's first since the inaugural station-assembly mission was launched from Kennedy Space Center almost six months ago.

ISS is the first truly international space venture, with partners including Japan, Russia. the United States and all 11 members of the European Space Agency, along with technical and material contributions from Brazil and Italy.

China hits out at US resolution on Tiananmen

BEIJING, May 30 : China on Sunday slammed a critical resolution by the US Congress before the 10th anniversary of the Tiananmen Square massacre of pro-democracy protestors, saving it incited "a new anti-China wave" and attempted to undermine national stability.

reports AFP. Beijing's "immediate, correct, and resolute measures" to quell the "disturbance" in 1989 maintained social stability and ensured the reform, opening-up and modernisation of the country, said an article by an unnamed official of the National People's Congress Foreign Affairs Committee.

The full text was carried by the official Xinhua news agency. "The US House of Represen-

tatives and Senate adopted anti-China resolutions on May 25 and 27 respectively with the excuse of the so-called '10th anniversary of June 4 incident'," said the official. The article said the resolu-

tion wantonly distorted facts. attacked China's human rights conditions, incited a new anti-China wave and attempted to undermine China's stability, and obstructed the development

of Sino-US relations. "It is well known that some people with ulterior motives in and out of China made that political disturbance in Beijing at the turn of spring to summer in 1989, in an attempt to overthrow China's legitimate government and subvert the socialist People's Republic of China.

"The experience of the past 10 years fully proves that if there were no such correct decisions made by the Chinese government at that time, there would be no political stability and today's remarkable economic and social progress and generally-recognized achievements in China," the commentary added.

Anti-China forces in the US and some other Western countries "played an inglorious role in that disturbance" by using their media to "hoodwink the international community,' it said. The protesters were given aid and shelter and were helped to flee the country.

"Now, the US Congress brazenly and peremptorily interfered in China's internal affairs in its anti-China resolution, flagrantly demanding that the Chinese government set up a certain 'investigation committee' and 're-evaluate' the inci-

dent," it said. The attempt to reverse the official conclusion -- that the protests were a "counter-revolutionary rebellion" -- is "extremely domineering" and doomed to failure, the official

said. The humanitarian disaster in Yugoslavia caused by US-led NATO bombing highlighted the hypocrisy of the US human this stance it added
