IRRI-Boro growers deprived of fair price

From A Correspondent

MAGURA: A bumper production of IRRI-Boro paddy has been achieved in this district, but the paddy prices are below the production cost of growers this season. Photo shows farmers waiting in vain at a local bazaar with their produce for a long time to get fair prices.

MAGURA, May 31: The price of newly harvested IRRI-Boro paddy in different hats and bazaars of the district is falling sharply.

The growers of four thanas are not getting fair price of their crops for want of genuine buyers.

According to the farmers, the paddy market is being controlled by a section of middlemen and influential persons. They are offering a low price depriving farmers of fair price.

Abdur Rahman, a farmer of Parnaduali village in the sadar thana said, the production cost was higher this year due to prolonged drought and absence of rainfall. The need for irrigation was about 50 per cent higher in comparison with the previous year. The cost of labour was higher in this harvesting season. The production cost of a maund of paddy was between Taka 280 to Taka 300. But as there is no genuine buyers in hats and bazaars in the district, the middlemen are offering lesser price. The farmers are compelled to sell paddy between Taka 250 to Taka 260 per maund which is below their production cost.

This correspondent visited Ramnagar, Nakol, Sachilapur, Khamarpara, Gangalia, Nutonbazar, Katakhal, Issakhada and Arpara. The places are famous for paddy trading. He found that a section of influential persons and middlemen had been dominating the paddy markets. They are also controlling price of paddy as there is almost no genuine buyers.

Expecting high prices the growers wait for their produce for hours together every day, but the middlemen offer them a low price. As a result they are compelled to sell their produce at the rate fixed by the middlemen and influential persons.

According to the District

Food Office sources, the government procurement drive of IRRI-Boro paddy and rice have been started through six buying centres in the district. The prices of paddy and rice were fixed Taka 825 and Taka 1,300 per quintal respectively. But the farmers are not coming forward to sell their paddy and rice to the government buying centres. As a result, till now the government procured only 286 metric tons of paddy and 230 metric tons of rice, while the target of procuring paddy and

rice was fixed at 1,200 metric tons and 3,000 metric tons respectively.

It may be mentioned in this connection that in four thanas of the district, the cultivation of IRRI-Boro has exceeded the targets though a prolonged drought prevailed during the paddy cultivation period.

In the district 29,855 hectares of land had been brought under IRRI-Boro cultivation which is 9,980 hectares more than the target. A bumper production has been achieved this year.

A total of 1,65,638 metric tons of paddy has been produced which is 91,106 metric tons higher than the target, the local Agriculture Extension Department (AED) sources said. The sources further said that the farmers of the districts got Krishi Bank loan and seeds supplied by BADC in time. They brought more lands under IRRI-Boro cultivation than the target fixed by AED to recoup their flood damage.

No Fax service in Natore town

From Anwar Ali

NATORE, May 31: There is no Fax machine for public service in the entire district.

The world is becoming smaller everyday. Months ago, the electronic mail service enriched the northern district of Rajshahi. But Natore, a close neighbour to the divisional headquarters, has no Fax service depriving its people.

Businessmen and media people here need fax service very badly to cope with the fast-paced world.

The President of the district Press Club told The Daily Star that newsmen here, in particular, had been the worst sufferers.

Even they have to miss reports very frequently due to lack of a fax machine," the press club president added.

Some other senior journalists also expressed their opinions in a similar tone.

Repeated appeals have been made to the government from different corners to install a fax machine at the local public call office (PCO), but the calls went unheeded.

It is to be mentioned here, Natore was not always without fax service. Two local businessmen started 'phone-fax service' here on trial basis last year but incurring losses they were forced to close the service.

But, Shahanur, one of the

two businessmen, told this correspondent that who intended to render Fax service must develop 'secret' relationship with some Telegraph and Telephone (T&T) officials.

He also informed that ghost telephone bills from the T&T Board in three consecutive months forced him to close the service.

Local elite, however, urged the authorities concerned to introduce Fax service at the local PCO immediately to solve the problems of businessmen and journalists.
