### CIVIL SERVICE REFORM & STRUCTURAL ADJUSTMENT

Author: S. K. Das  
Publisher: Oxford University Press

The task of civil service reform is not merely of trimming the service or building capacity, but also of holding the civil service to account for its actions. This book is about building such a civil service in India: one that is lean and accountable. Drawing on the insights of public choice theory, modern institutional economics and agency theory it suggests that the essential task is one of designing an effective contract between the minister and the civil servant, in order to clarify the relationship between the two and the expectations regarding performance.
