

# TWINS

## MYSTRIES

**DO YOU KNOW?**  
The birth rate for twins is approximately 26.8 per 1,000 live births in USA. It is estimated that there are currently 2.4 million sets of twins in the US and about 33,000 are born each year.

The Jim Twins

me. In 1970 we were about 2,000 miles apart. In 1980, I was in Naples, Italy, and she was in Oregon. We know when to call each other, have sent our parents the same card or gift even if thousands of miles apart. When I

had surgeries while in the Navy, she had to be medicated for the pain or treatment. If I notify her in advance she can control or manage the pain. - Linda N.

### I Feel What You Feel

When the twins were 5 years old they were in a traffic accident that left one twin with permanent brain damage. While they were in separate hospitals (one was flown air ambulance to a larger city) the twin that wasn't in a coma was throwing his arm up over his head like the other twin had started to do. Our physician, being curious, started asking Stacey about Tracey's head injury. He perfectly identified to the doctor where Tracey's head was injured and described to him the pain that Tracey was feeling. Before and after the accident Stacey was always the dominant leader and Tracey usually did everything Stacey told him to do. They had twin language and Stacey would decipher for me. They are 32 and live in different states, but when one calls on the phone usually within 10 minutes the other twin will call me. Recently, Tracey was having some medical problems and I never told Stacey because we didn't want to alarm him. When I did tell him he said that he felt a lot better because he didn't know why he was having headaches but was planning on going to the doctor to find out why. He knew right away the headaches would go away because Tracey was being treated for headaches. - Linda T.

### The Jim Twins: The Classic Case

Adopted by separate families shortly after their birth, identical twins Jim Lewis and Jim Springer met 39 years later and discovered more than a brotherly bond. The similarities in their lives, from their given names to their choice of automobile, were simply astonishing. Is it possible that their bond as brothers extended beyond the mere genes they shared?

39 years later, in 1979. At the time, there were only 19 reported cases of reunited twins, so for psychologist Thomas Bouchard the man who studied them this reunion offered a rare opportunity to examine questions about nature vs. nurture. The similarity of the twins' separate lives shed light on the power of genes in determining our lifestyles:

1. Both were named Jim by their adoptive parents.
2. Each had married two times, the first to women named Linda and the second to women named Betty.
3. Jim Springer named his son James Allen, while Jim Lewis chose James Alan.
4. Both had dogs named Toy.
5. The two drank Miller Lite, smoked Salems and drove Chevrolets.
6. Both shared carpentry as a hobby and had built identical benches around trees in their backyard.
7. They hated baseball and loved stock car racing.
8. They chewed their fingernails obsessively.
9. They both spent time as sheriff's deputies.
10. Each was an average-to-poor student in high school.
11. They had voted for the same candidate in the past three presidential elections.
12. Each Jim doted on his wife by leaving love notes for her around the house.

different environments.

Others are also studying the complexity of development by observing how twins influence each other, sometimes in adverse ways. The strong bond between twins, while usually described in harmonious terms, sometimes leads to troubling outcomes. When one twin is strongly favored, the rejected twin can sometimes react in violent ways. In other instances, the bond between twins can be so intense that outside influences are enough to prevent certain pairs from retreating into their own world.

By the anecdotal evidence on twin ESP, telepathy (ESP) revolves around major life events such as severe injuries, births or deaths. Many twins have reported experiencing phantom pain when the other twin is injured. Identical twin Donald Keith once reported inexplicable pain in his groin and later learned that his twin brother Louis had injured his groin that day. When Donald learned of his brother's injury, the hair on the back of my neck stood straight up." Donald also claims that he can make his brother call by concentrating; he allegedly does this several times a week. He believes that twins have a special bond between their brains more receptive to this kind of communication: "I think of there being windows in the mind. Because twins are closer to each other's thoughts, they are more likely to have the windows open."

The mysteries of identical twins and the astonishing similarities between them has led paranormal researchers to study ESP experiences and even twins' abilities to share the same consciousness phenomena referred to as the nonlocal mind.

The hypothesis of the nonlocal mind is adapted from quantum theory, developed by physicist J.S. Bell. It states that two subatomic particles come into contact with each other and are then separated, a change in one results in a similar change in the other, "instantly and to the same degree." According to researcher Russell, a intriguing experiment done in the 1960s provides evidence for the nonlocal mind. Researchers pointed a camera at one twin and found that the other twin's brain activity changed in response.

These snapshots of the lives of twins certainly point to the power of genes in human development as well as the connection between the minds of identical twins. Could these more obscure theories of altered consciousness be explained away by sheer coincidence? The majority of the evidence is anecdotal, it's hard to find those who think that their twin is dead or in pain when they aren't.

## CASE STUDIES

**Image Twins**  
Linda and I are identical mirror image twins, and we were born during high school we traded dates, went to each other's classes. Janie is the oldest and the tallest, she has the messages mostly. During labor with both of us in 1970 and 1980, she went into labor pains with

and look at it for while! Messiah's 3D objects take account of your hardware: with a slow PC the characters will lose polygons to compensate. In Messiah's most technically impressive achievement, the engine does this in real-time, so when the action hots up the detail level drops to keep the frame rate static (this means that you will get the same frame rate throughout the game!).

### SPECIFICATIONS

Requires: Pentium-233, 32MB RAM

Recommended: Pentium II-300, 64MB RAM

### FINAL WORD

This game is cool and Bob is quite cool too but you might not like this game! This game is strictly rated M-Mature or 18+ and it is! It has pimps, prostitutes and lots of violence so I am warning you! If you are not yet 15 then don't play this game! By the way, visit Messiah's site at [www.messiah.com](http://www.messiah.com) for demo, news and other stuff for Messiah!

### TIPS & CHEATS

If you have brought Messiah you must be having probs crossing the first level! To solve your problem here are the cheats and some tips!

#### TIPS

1. Stealth is your ally. Be patient and try not to be seen while you are trying to possess someone.
2. Remember that you can use sniping mode to get a close-up look at things. It's not just for combat.
3. Don't forget that you can crouch and also glide. To glide, press and hold the jump button.
4. You might find it handy to harm or even kill your host body. Hosts will often be mad at you when you dispossess them, so you can get away from them if they are hurt or even falling to their death.
5. Don't forget that you can possess non-humans, such as rats. These creatures might allow you to get into areas you otherwise couldn't.

## CHEAT CODES

By Monzur Morshed

Need For Speed: Porsche Unleashed

All Cars and All Tracks: Go to the multiplayer option and choose Peer to Peer. Now you can race with all cars and on all the tracks. It isn't necessary to play with others...you can do it alone.

**Infinite Money on Evolution Mode:** Buy a used car and do an OVERALL repair. After repairing, the value of the car will be higher than the price that you payed for it, and the repairs. Sell the car and notice that your money will be higher than your initial one. There is an infinite number of used cars in the shop so, just do this infinite times to have infinite money.

**Street Fighter EX 3 (For Playstation 2) Cheat Code**

Bonus characters: Beat the original mode with a regular character without continuing to unlock one of the hidden characters. Another character will be unlocked each time the game is finished, in the following order: Sagat/ Vega/ Garuda/ Shadow/ Geist/ Karin/ Pullum/ Area/ Darun/ Vulcano

## Love Virus

By Monzur Morshed

This deadly virus is more notorious than CIH, Melissa or Happy99. It's spreading in thousands of computers. Experts are saying that the creator of the Love Virus is "Spyder" who lives in Philippines. It is a VBS worm that mails itself to everyone in your address book. It has the ability to download an executable, which can steal passwords when it is run.

\* The Signs: It spreads through E-mails. The message you'll see is "kindly check the attached 'LOVE LETTER coming from me'. The name of the attachment is "LOVE-LETTER-FOR-YOU.TXT.vbs". It has a sentence "i hate to goto school" in it's script. Three variants of this virus have been discovered.

The email's subject is "ILOVEYOU". It only spreads from MS Outlook.

\* Antivirus: Popular companies like McAfee and Symantec has uploaded "Love Bug" patch/update for their anti-viruses. These are quite small, so download them now. You may also search in [www.download.com](http://www.download.com) for a lot of Love Bug Anti-viruses.

McAfee Update = <http://a868.g.akamai.net/7/868/903/5fabbf685a9e1c/download.mcafee.com/products/datfiles/extra/lovenew4.zip>

To use this patch, simply unzip this file and place the EXTRA.DAT file in the McAfee VirusScan folder with the other DAT files. You must have McAfee VirusScan (95/98) to use this fix.

## Baby One More Time

### BRITNEY SPEARS

Intro: A#5-C5-C5

Oh baby baby, Oh baby baby (Verse 1)  
(Cm) Oh baby baby, (Gm) how was I supposed to know (D#)  
(D#/Fm) that something wasn't (G) right here (A#5-C5-C5) [RPT chord sequence]  
Oh baby baby, I shouldn't have let you go and now you're out of sight, yeah show me how you want it to be tell me baby cuz I need to know now, oh because  
CHORUS  
(Cm) My loneliness is killin' (Gm) me (and I) (D#) I must confess I still (Fm) believe (still believe) (G) (Cm) When I'm not with you I (Gm) lose my mind (G/D#) give me a sign, (Fm) hit me baby (G) one more time! (Verse 2: verse 1 chords)  
Oh baby baby, the reason I breathe is you Boy you've got me blinded Oh pretty baby, there's nothin that I wouldn't do that's not the way I planned it Show me how you want it to be tell me baby cuz I need to know now, oh because

### CHORUS

(A#) Oh baby baby, (Cm) how was I supposed to know (Gm) Oh pretty baby, (D#) I shouldn't have let you go (D#) I must confess that my loneliness is (Fm) killin' me now (G C#) don't you know I still (A#) believe that you will be here (G#) And give me a sign, (Fm) hit me baby (G) one more time

### CHORUS (repeat 1st chorus chords)

I must confess (my loneliness) that my loneliness (is killing me) is killing me now (I must confess) Don't you (I still believe) know I still believe that you will be here (I lose my mind) And give me a sign...  
HIT ME BABY ONE MORE TIME!
