The second way is in the sword itself—when you make kills with the sword, a certain amount of experience accrues directly to the blade. As it gets more powerful, you will be able to swing with much more ferocity. Also, the blade has differing graphics at each level of power; by the time it gets to level five (the max), it hums and glows with so much power that it looks like a lightsaber. You will need to have the sword at maximum power to defeat the end boss, by the way, so get those kills in early (this is tip 1!)

BETTER THAN QUAKE 2? NOPE! (GRAPHICS)

The graphics of this game had been taken from the Quake 2 graphics engine! It's been around 5 years until they made a game from that engine! Q2 had been released and they game you will understand yourself! I didn't believe this but when you play the Q3 or UT! Areas of the game slowed down unacceptably for no apparent reason, and textures vanished and reappeared at random. Though it might be better off playing it on a TNT2 or 3Dfx card but I don't think it will be any better!

WANNA PLAY WITH YOUR FRIENDS? IT'S NOT WORTH IT! (MULTIPLAYER)

We all know that FPS games like Daikatana comes with Multiplayer options but this one really sucks! The game comes with four modes of multiplayer: cooperative play, where players work together to defeat the monsters in the normal game; straightforward deathmatch; capture the flag; and a team-based game called DeathTag. DeathTag has two-person teams, and the gameplay requires that one player be inside the enemy base to hit a switch that opens a door where the other player retrieves a bomb. This bomb must then be taken to a scoring area.

I invited friends from all over the world to play with me (yes, they got it one month ago!) and well we got online and started playing! You know that as I told before SOF is a game just like this but it was suitable for Dhaka Connections but Diakatana differs a lot over here! As I got online and connected to the server and waited for the game to load it crashed!! Okay, I connected again and then it loaded and the fragging began! As I saw it was not suitable for me to play the game cause I was continuously suffering from speed deflation! Maybe it was because of the line noise of our phone! But the game really suffers from poor Multiplayer, those guys told me!

NOT SO TOUGH - SPECIFICATIONS!

Pentium II-300, 64MB RAM, 400MB disk space, 8X CD-ROM, 16MB OpenGL 3D accelerator card

NOT WORTH IT!! (FINAL WORD)

Is Daikatana worth it? I don't think so and I think that you might also think so! I would rather advice you to spend your time and money on any other game but this! If you have played it and think that I am wrong then just let me know! It's your choice!

(D) Night was black was no use holding back 'Cos I just
had to see was (C) some-(D) one watching me
(D) In the mist dark figures move and twist was all
this for real or (C) just some (D) kind of hell

[Chorus]

(C) Six six (G) six the (C) number (D) of the beast
Hell and fire was born to be released

[play verse]

Torches blazed and secret chants were phrased as they
start to cry hands held to the sky
In the night the fires are burning bright the ritual
has begun satan's work is done
(C) Six six (G) six the (C) number (D) of the beast
Sacrifice is going on tonight
