Sources with the railway terminal said despite regular servicing, many ferries cannot work smoothly. Very often the boats go out of order for unknown reasons, the sources added.

Very recently the repair and maintenance works of wagon carrier Barge No 10 were conducted at Narayanganj Dockyard spending Taka 37 lakh. But soon after its re-commissioning a large crack developed at the bottom of the vehicle.

According to Department Agriculture Extension (DAE) sources, 35,500 hectares of land were brought under IRRI-Boro cultivation in the district with a production target fixed at 1,03,840 metric tons.

The bumper production has been possible this season due to favourable climate. The yield has

exceeded the production target.

Some farmers told this correspondent while visiting some plots of IRRI-Boro paddy field under Bhanga upazila that they (farmers) are in great tension as day labourers are not available in Bhanga area to harvest the IRRI-Boro crops.

"There are no poor people living here" one farmer said adding that most of the people in the area are solvent for having good IRRI-Boro paddy for more than a decade. At present they have to purchase day labourers from the neighbouring districts at

high prices to harvest the crops. One day labourer is getting Tk 100 with three free meals per day, he mentioned.

However, harvesting of the IRRI-Boro has already been started. Heavy rains which occurred a few days back have caused some damage to the standing IRRI-Boro paddy in the low lying areas, the said.

Housewives in the area are also busy storing IRRI-Boro crops and making different cakes and fried rice.
