

A member of citigroup

AN OPPORTUNITY TO WORK WITH THE WORLD'S NO.1 BANK

Citibank, N.A. with its headquarters in New York is the world's most global financial institution with a presence in 104 countries. In 2001, total profits for Citigroup were \$ 14.13 billion, the largest amount by any bank, ever. In Bangladesh we have an expanding operation in Dhaka and Chittagong. This success for our business has created new career opportunities.

We are currently looking for two high caliber individuals to be appointed as Manager.—Corporate Support and General & Infrastructure Services Manager.

Manager — Corporate Support

- Sound understanding of credit and risk management in banks.
- Good understanding of market dynamics, business risks & industry trends.
- Conceptual understanding of the regulatory environment.
- Ability to work independently in a challenging and target oriented environment.
- MBA or equivalent qualifications.
- 2 to 4 years banking experience in relationship / corporate risk management.

General & Infrastructure Services Manager

- Take a proactive approach in managing and maintaining premises/fixed assets/ vehicles and provide safe & effective working environment.
- Ability to identify and analyze security issues, propose solutions and promote safe working conditions and expenses control supervision.
- Knowledge of and proficiency in recognized procurement standards and vendor management practices.
- Excellent verbal and presentation skills and a strong customer service orientation and mature approach to supervising staff and vendors.
- Basic project management skills including planning, establishing milestones and project budgets.
- Basic computer/e-mail skills.
- Is highly motivated and has a university degree with specialized training or proven experience in procurement, security and safety matters in a civilian or military environment.

Applications with envelopes clearly marked for the position applied for should be sent to Box.No. A-986, C/O The Daily Star on or before 12th March, 2002.

Red or Black — Holcim means quality

Worldwide, Holcim is one of the leading companies in cement and aggregates, with presence in over 74 countries and 90 plants.

Regarding customer queries about Holcim Black, we, at Holcim, would like to assure our consumers that we maintain strictest vigilance in quality control to supply the best products.

Cement technology used in Holcim Black is used all around the world: from the Great Belt bridge of Denmark to the Petronas Twin Tower of Malaysia or world's tallest hotel Chicago Tower.

Ever since we have launched Holcim Black, we have received enormous appreciation from the users as well as experts from the Construction Industry. This cement is particularly suitable for climatic conditions like Bangladesh, and pools the global experience of Holcim's cement technology. BUET and other test results of our cement have consistently proven it to be excellent in quality. Success of Holcim has caused some immoral cement traders into spreading misinformation. Consumers are requested to be cautious about such propaganda.

We have supplied to the world the best cement, and we promise to do the same here in Bangladesh. If you have used any of Holcim brands, Red or Black, you have used the best in the market.

For any clarification, you may always contact our Retail outlets or the company directly at 9881002, 017-540560, 017-560456.

Employment at the Afghan Wireless Communication Corporation

This company has been operating in Afghanistan since 1999 and is a joint venture formed between a Group of International Investors and the Afghan Ministry of Communications to provide international and national telephone services; the installation of a mobile telephone network; wireless local loop and other telecommunications services encompassing data and internet connectivity. For the past three years, the services on offer have been very restricted for the obvious reasons but following the overthrow of the Taliban there has been an incredible increase in activity. After 20 years of war in Afghanistan, communications are going to form a crucial role in efforts to rebuild the country's shattered economy and these initiatives are being backed by both US and UK governments.

The company now has very ambitious expansion plans which provide a number of opportunities for applicants to play a significant role in the rebuilding of the country's infrastructure and the economy. Applicants will have experience in start-ups, particularly in developing and underdeveloped countries, with a demonstrable ability to work in culturally sensitive environments. The ability to speak Dari, Pashto or Farsi will be an advantage but is not essential.

Applicants should be aware that skills transfer to Afghan personnel is a key part of company's operating philosophy. The following personnel are required with immediate effect:

Position	Description	Quantity	Position	Description	Quantity
Network Designer	5 years experience in the design of core and access networks, from the base stations to the main switching centers and the network around them. The work will involve future planning, traffic capacity planning and scenario building for cost analysis.	2	Riggers	Experienced in the erection of radio masts, towers and heavy equipment. Capable of calculating lifting requirements of cranes, etc. Also experienced in fixing and aligning telecoms antennas and dishes. Experience of GSM preferred.	3
Radio Planner	5 years experience in the design of GSM radio networks, including assessment of base station sites, frequency planning, link budget preparation and maintenance of all drawing and coverage predictions. Must also be able to perform drive-by testing of existing coverage.	2	GSM Switching Engineer	Experienced in the configuration, installation and commissioning of GSM main and base station switching equipment. Knowledge of different switching equipment an advantage.	7
Transmission Planner	5 years experience in the design of microwave networks, including site preparation and the testing and commissioning of equipment. Must be able to monitor usage and plan according to actual traffic loading.	2	PABX Switching Engineer	Experienced in the configuration of PABX switching equipment. Knowledge of different PABX switches an advantage.	7
Site Planner	Must have experience in the preparation of base station sites from the choice made by the radio planners to the completion by the commissioning engineers. Will take responsibility for the design of the building and the common systems (HVAC, power, etc) and the installation of all such equipment ready for GSM installation.	2	Data Project Manager	Experience of implementing data and internet services and networks against tight deadlines, and of working closely with the providers of the other networks to ensure quality of services is provided and maintained, and will have demonstrable abilities in skill transfer. Management experience required.	1
Civil Engineer	A minimum of 5 years work experience, the successful applicant will have university degree in civil engineering and experience of design and supervision of general civil and building construction. The work will typically involve site surveys, foundations for towers and equipment and small building works. Experience of telecoms building's an advantage.	1	Data Engineer	Experience of implementing data services and networks against tight deadlines, and of working closely with the providers of the other networks to ensure quality of services is provided and maintained. Demonstrable abilities in skill transfer.	2
Mechanical Engineer	A minimum of 5 years work experience, the successful applicant will have university degree in mechanical engineering and experience of design and supervision of a variety of installations. The work will typically involve heating, ventilation, air-conditioning, plumbing, sewage system, drainage, etc.	2	IT Technician	Experienced in operating and maintaining IT networks, repairing faults as they arise and configuring PCs, LANs and WANs.	2
Electrical Engineer	A minimum of 5 years work experience, the successful applicant will have university degree in electrical engineering and experience of design and supervision of installations. The work will typically involve site surveys, calculating power supply requirements, specification of electrical equipment, standby generators, lighting protection/grounding, etc.	1	Security Specialist	Specialist in IT security procedures in both stand-alone and dial-up networks.	1
Electricians	Experienced in the installation and maintenance of antenna systems, specialist cabling, grounding, switching, power supply, voltage regulation, surge protection, etc.	4	Equipment Repair Manager	Controller of all repair functions, particularly of GSM handset equipment, but also to take control of the return and repair procedures for all network equipment in the country.	1
Plumbers	Experienced in all aspects of pipework and plumbing for building, including central heating work, domestic hot water boilers, galvanised, plastic and copper pipes, bathroom fixtures, gas supplies, etc.	2	Repair Technician	Experience in fault diagnosis and first-line repair of GSM handsets.	2
Carpenters	Experienced in all aspects of site carpentry, form work/shuttering, concrete work, windows and door fitting, roofing, fencing, partitions, plasterboard, tiling, painting, etc.	4	Transmission Manager	Responsible for the operations and maintenance of the international and national VSAT networks and national GSM radio network, including microwave equipment. Management experience essential.	1
Wiremen	Experienced in the cabling of telecoms equipment, in both coaxial and copper cable installations.	5	Internet Engineer	Experience of implementing internet services and networks against tight deadlines, and of working closely with the providers of the other networks to ensure quality of services is provided and maintained.	8
Satellite Engineer	Experienced in the installation, operation and maintenance of VSAT system, up to 4.6 meter antenna both C & Ku Band. Knowledge of a variety of transceivers, satellite modems, DCME equipment, multiplexors.	2	Billing Analyst	Experience in defining and producing billing reports, analyzing them, and reporting conclusions. This to be done from switch capacity, switch usage pattern, and fraud perspective.	1
Microwave Engineer	Experienced in the installation, commissioning and operation of the microwave equipment of various types.	2	Management Accountant	Qualified accountant with several years post-qualification experience in service industries. Telecommunication experience preferred.	1
Stores Manager	Experience in controlling and taking responsibility for the secure handling of goods in and out of the company stores. Integrity essential.	1	Procurement Manager	Experience in the handling of purchase orders and the national and international sourcing of equipment. Must be highly organized and capable of controlling complex purchasing requirements. Integrity essential.	1
Catering Manager	Responsible for the provision of foodstuffs and correct preparation of food for Bangladeshi community within AWCC.	1	Logistics Manager	Experience of controlling and taking responsibility for the storage and movement of materials and personnel in highly complex, fast-moving, geographically-spread operation. Experience of controlling a vehicle fleet highly desirable. Integrity essential.	1
			Cook	Experienced cooks with proven track record of suitable catering for a Bangladeshi community in a foreign country.	2
