Underground metro rail can ease traffic congestion

STAFF CORRESPONDENT

It is only a dream now. But it can be true one day when the city commuters will not face any hassle while travelling from one place to another.

"Yes, it can be true if the people and the government accept my proposal of an underground metro rail project designed for Dhaka city," said Mohammad Masud Reza, a Bangladeshi engineer and the managing Director of Contech Limited.

At a press conference in the city yesterday, he presented the metro rail project designed to ease

the traffic congestion, a regular feature in the capital city.

Masud, who is now doing his PhD in the USA, said the project can be implemented in two years without any foreign assistance. And it will cost around Tk. 2500 crore. Even there is no need to involve any foreign company in the project, he added.

The fund can be raised by floating share in the stock market, selling government property or charging levy on mobile phone or through lottery, he suggested.

According to proposed project. it will be a circular loop of 35 km long rail lines in single direction with at least 29 stations.

The design shows that primarily, the train will start from Gabtoli and it will return to the same place after travelling down to Sayedabad via Motijheel. It will cross Gulistan and the New Market areas while returning to Gabtoli.

The rail lines will intersect each Noakhali and Dhaka-Mymensingh other at Sonargaon Hotel crossing and at Gulistan, according to the

> Referring to the metro rail service in Kolkata, Masud said the soil condition, climate and standard of living is very much similar to Dhaka's, so it will be easy to implement the project here.

> Replying to a query, the engineer said he did not submit any formal proposal to the govern ment yet. "I shall take initiatives in this regard very soon," he added.
