Minimise costs. Maximise utilisation. Virtualise your storage.

HP's virtualisation solutions simplify storage management while making the most of the storage you already have. Your data storage needs keep expanding. Your budget keeps shrinking. HP's EVA3000 and EVA5000 virtual arrays can solve both problems. They let you pool your storage, so it can be instantly assigned wherever, whenever and in whatever amount it's needed. Efficiency doesn't come at the expense of complexity either, thanks to an intuitive Web interface. And HP is the only company that offers host, network and array-based virtualisation solutions. Lower costs. Higher utilisation of your assets. It's a virtual no-brainer.

**HP StorageWorks EVA3000**  
Dual ported 2GB FC-AL channels
