

## BABY MONITORS

## Calming vibrations monitor

THE Gentle Massage Monitor is the only monitor that allows mom to respond to baby's call with calming vibrations in the crib from anywhere around the home. The Gentle Massage Monitor soothes baby with remote activated crib mounted calming vibrations and/or the soothing sounds of a rolling seashore. These soothing features may be remotely activated by parents anywhere in the home, from the transmitter unit and directly on the soothing unit.

The monitor features a sound activated light display, crystal clear reception and 2 channels to minimise interference so mom can keep in touch with her baby. Crib soother gently vibrates mattress to soothe baby like a ride in the car. Three settings: calming vibrations, wave sounds or both. Easily attaches to crib like a mobile.

## Childview TV &amp; video monitor

THIS deluxe child view monitor and television lets you clearly see and hear your baby. The 5-inch black and white television provides "day and night" security with infrared LEDs that provide clear "night vision." Camera can be wall-mounted or placed directly near your baby, and television can stay in any room you are in. Both monitor and camera are compact and lightweight. The monitor and camera both run on AC adapters. TV monitor gives parents the option to just watch or to listen and watch baby.

## Movement sensor with sounds monitor

LAY your baby down to sleep with total peace of mind. The BebeSounds Movement Sensor with Sounds Monitor is two monitors in one. The ultra-sensitive sensor pad is placed under the crib mattress (or cradle or bassinet) to detect your baby's slightest movements.

The parents' unit receives the signal and sounds a "no-movement" alarm if no movement is detected for 20 seconds. In addition, the system can be used as a traditional sound monitor to pick up your baby's cries and coos with a range of up to 330 feet. The monitor features 2 different channels to help with interference and 3 volume settings.
