

## Soothing dream monitor

**S**OOTH the baby from anywhere around the house with the Soothing Dreams Monitor that plays nature sounds, lullabies and features a light show. Sound lights and two channels let you monitor when baby needs you. Soothe baby in one of five ways - ceiling light show projects images of a starry night, monitor plays soothing nature sounds, monitor plays traditional lullabies, monitor emits a soft gentle nightlight or use your own voice. The two way monitor lets you talk and sing to baby without entering the nursery. Sound lights let you see as well as hear baby's call. Two channels minimize interference and the portable receiver with belt clip can be used anywhere in your home.

## Wireless Security Camera and Monitor with 2.5-inch Color TFT Active Matrix LCD

**T**HIS new wireless security system with 2.5-inch colour TFT Active Matrix LCD screen lets you watch and listen for your children's safety or your own personal security from all around your home and yard with the portable hand-held monitor. Take the wireless monitor when you leave and you can even observe inside your empty home or apartment before entering when you return! The 2.4 GHz signal transmits colour video and audio up to 100 feet through walls and floors. Superior infrared night-vision technology also captures clear images from rooms that are totally dark so it's ideal as a baby monitor! Discreet, wireless camera/transmitter easily mounts to a wall or stands on a flat surface. The camera head tilts and swivels into any desired position to observe from any angle. The portable monitor features four selectable transmitter frequencies to optimize reception or can accommodate up to four transmitter/cameras (extra wireless security camera), with the option to display each camera's image in succession. Includes audio-only setting.

## Everywhere Monitor

**F**INALLY, there's a monitor that's tough enough to stand up to your active life! The only impact- and water-resistant monitor on the market, this 900 MHz model features the most advanced technology so you can clearly hear baby anywhere - even when you're in the shower! Other great features include sounds lights so you can "see" baby's noise, and audible out-of-range indicator and a low battery indicator. Two channels maximise clarity.

## Family Listen n talk monitor

**T**HE new Graco Family Listen N Talk Monitor offers the newest in technology while giving you the peace of mind that comes with knowing your child is safe. The monitor system features two receivers and one nursery monitor - all, which can speak and hear each other. Full sound lights on the receivers allow you to hear as well as see the baby's sounds clearly. The push-to-talk buttons on the receivers enable you to soothe the baby with your familiar voice.
