Ensure
Your
Security

Bangladesh is a part of the Bengal Basin lying in the confluence of the India, Burma and Eurasia plate. The Basin which is one of the most seismically active zones of the world, is extremely prone to earthquake disasters and in the past have experienced some of the worst earthquakes in the history. A strong earthquake may lead to heavy damage to life and property. **United Insurance** offers a competitive policy for your security and cover the risks of such a catastrophe.

We also issue Medical Insurance cover under a Health Plan to meet your medical needs.

Do you fit in?

For more than 100 years, Unocal has been one of the leading energy resource and project development companies around the world. Today it is the single largest US investor in Bangladesh, producing natural gas from the north-eastern part of the country. Our strong heritage has enabled us to become a successful, modern and forward thinking organization. We are looking for performance driven, energetic, skilled professionals to fill the following vacancies:

Trainee Health, Environment and Safety (HES) Specialist

This is an entry level position for our Gas Plant located at Sylhet region. The purpose of this job is to help and facilitate HES processes and practices and extend awareness among the users to ensure safe work practice in gas processing plant. The incumbent will be primarily responsible for the following:

- Monitor health, environment and safety related issues in day to day operations and report noncompliance.
- Drive and facilitate incident investigation, periodic inspection & audit complying with Operation Management System (OMS)
- Carry out training programs related to HES to build awareness
- Maintain data/records related to HES noncompliance with the Unocal OMS Program.

Successful candidate should possess the following:

- A graduate in Environmental/General Science from a reputed local/foreign university/college. In-line working experience in oil and gas/petro-chemical industry will be an added advantage.
- Proficiency with MS Office applications
- Strong interpersonal/communication skills with good command over English and Bengali
- A self driven individual with good sense of urgency at work.

Trainee Chemist

This is an entry level position in our Gas Plant located at Sylhet region. The purpose of this job is to assist laboratory activities to provide day to day analytical feedback and assure quality of the substance used in gas processing plant. The incumbent will primarily be responsible for the following:

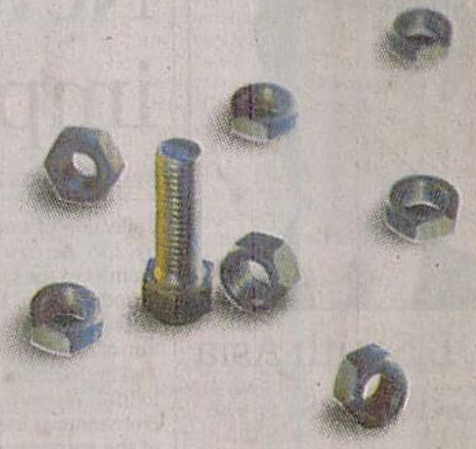

- Plan, design and implement day to day laboratory activities
- Collection of test samples, analyze and prepare reports
- Maintain quality assurance and quality control of all lab activities conforming to Company's HES standard
- Help to ensure continuous improvement of laboratory work, procedure and practice
- Maintain data/records of sample test results and update chemical control inventories

Successful candidate should possess the following:

- A graduate in Chemistry/Applied Chemistry/Analytical Chemistry from a reputed local/foreign university/college. Prior lab experience as a Chemist in oil and gas production facilities/petro-chemical industry will be an added advantage.
- Proficiency with MS Office applications
- Strong interpersonal/communication skills with good command over English and Bengali
- A self driven individual with strong initiative

Our ideal candidates should be well rounded top performers who can be key contributors to a high energy growth environment. All incumbents are expected to work in a cross cultural environment, possess good team work and leadership skills.

Interested candidates who fulfill the above requirements are requested to **apply online at <http://www.bjobs.com> on or before April 30, 2005**. Only the short listed candidates will be called for interview and other selection steps for final selection. **No hard copy will be accepted.**
