Mobile courts realise Tk 10.35 lakh in fine

STAFF CORRESPONDENT

Thirty mobile courts led by magistrates fined about Tk 10.35 lakh for keeping sub-standard and unsafe foods in restaurants and shops, and irregularities in transport services in different areas of the capital yesterday.

Besides, the courts filed 391 cases against persons and organisations on charge of selling adulterated food, violating traffic rules and realising extra fares and overloading in buses and

The mobile courts also took actions against unfit vehicles, illegal parking and encroachment of footpaths in the

Sergeant, 5 others sued for extortion

COURT CORRESPONDENT

An extortion case was filed against six people, including a traffic sergeant, with a Dhaka court yesterday.

Mohammad Jahangir Alam, a rickshaw-trader of Swadhinata Sarani, North Badda, filed the case with the Chief Metropolitan Magistrate's Court against Sergeant Mohammad Nuruzzaman, his source Abdur Rob and four other unidentified persons.

Magistrate AJM Abdullahel Baqui

said Bashar, a rickshaw-puller, leased a rickshaw from his garage at about 6:00am on September 3. The sergeant stopped the rickshaw at Mouchak crossing and demanded Tk 3,000 as toll from Bashar although the latter showed all valid documents.

The rickshaw-puller refused to pay the toll and the sergeant became angry

Niko barely averts 'third blowout'

Relief well likely to be done safely in a week

As Canadian company Niko's drilling of the relief well at the twice blown out Tengratila gas field reached a critical stage on Tuesday, its Bangladeshi partner, Bapex, at the last moment detected serious lapses in Niko's preparations for the final phase that could lead the gas field to a third explosion.

With Bapex's intervention, it is now expected that the relief well will be completed safely within a week, sources

Niko was scheduled to complete this well by October 1.

During a visit to the Tengratila field in Chhatak, the Bapex managing director (MD) was irked to see that Niko did

not have adequate preparations for the final phase of drilling the relief well.

Of these, Niko did not have adequate barite', a chemical used for killing the well. "Niko had only 200 tonnes of barite," said one source.

The MD pointed this out and said Bapex can provide additional resources on an emergency basis but Niko officials and experts were initially reluctant to

However, by midnight Tuesday, Niko contacted both Unocal and Bapex. Bapex yesterday started sending 800 tonnes of barite from its stock in Chittagong and Unocal another 200 tonnes from its Moulvibazar field.

"Despite two rounds of blowouts due

to operational negligence and faults in its record, we do not know why Niko was once again ill prepared to seal this well. We can't say if it was their negligence or sheer over confidence. But it is a bad idea to have inadequacies at the last stage of an operation," noted one source.

Barite is used in the mud pumped inside the relief well to maintain stability of gas pressure. An unstable condition can trigger a third blowout, the source

Luckily, the blown out gas field is behaving in a stable manner since Niko reached the damaged gas well

India reopens consulate in Karachi next year

India will reopen its consulate in Pakistan's largest city Karachi by January 2006 after a gap of nearly 12 years, as part of an ongoing peace process, the Indian foreign minister said Wednesday.

Visiting Minister Natwar Singh told reporters in the volatile southern city that he had asked the consul to finish the renovation of India House by December

"We will be giving visas from January and the Pakistani consulate in Mumbai will also be functioning by that time,' added Singh, who was in Pakistan for peace talks and returned home yester

Bangladesh faces a shortage of gas in Tata officials also proposed to

Negotiations over gas between the

government and the Tata Group are

advancing slowly with both sides

The Indian industrial giant, on the

fourth day of discussion with

Petrobangla officials, vesterday

demanded the government's guaran-

tee of issuing no new connections if

form a joint committee to monitor gas production by setting a threshold level. The group demands that once their industrial units should get gas on a priority basis by stopping supply

The government, however, told showing a rigid stance on the sensitive Tata Group representatives such a guarantee cannot be made as it seems unrealistic.

to other consumers

Talks with Tata slow

down on rigid stance

The Indian conglomerate Tata also demanded certification of the entire gas reserve before signing deals with

The government is also declining the demand as gas reserve certification is an expensive project and not mandatory as per existing laws.

Tata demands 25 years of uninterrupted gas supply to its steel industry

on gas supply issues and another 20 years to its fertilizer industry, while the government proposes an assurance of 20 years for both.

The group is also demanding 1.5 trillion cubic feet of gas for 30 years for its three projects, while the government is still negotiating a much lower supply.

Meanwhile, another Tata Group team yesterday met energy ministry adviser and Board of Investment Executive Chairman Mahmudur

After the meeting Rahman said the negotiations are progressing well and both sides are satisfied over the advancement. Tata representatives at the meeting informed him about the progress of the negotiations, he added.

INT'L CIVIL SOCIETY FORUM ENDS

Call for free access of LDC products

STAFF CORRESPONDENT

The International Civil Society Forum yesterday adopted Dhaka Declaration 2005, reiterating the demands of the least developed countries (LDCs) for providing duty and quota-free access of their products to the developed countries. "Zero-tariff access for all goods

originating in the least developed countries remains as elusive as ever. We reiterate the LDC demand for dutyfree access of all their products in the developed countries, secured and bound in the WTO [World Trade Organisation]," the declaration said.

The forum urged the governments of the LDCs not to compromise the interest of their citizens in the face of pressure from the big trading blocs, international financial institutions and

It welcomed recent initiatives by

some developing countries to extend zero-tariff market access to the LDCs and urged other developing countries to do the same The Centre for Policy Dialogue

(CPD) organised the three-day "Inter-

national Civil Society Forum 2005 for Advancing LDC Interests in the Sixth WTO Ministerial" ending yesterday at Sheraton Hotel in the capital. The forum strongly emphasised the urgent need "to operationalise the objectives of coherence" between the

WTO and international lending institutions, including the World Bank and the International Monetary Fund, in line with the rights and flexibilities that LDCs have obtained under the WTO. CPD and its co-organisers will send ioint letters to all trade ministers

Three share chemistry Nobel prize

Robert H. Grubbs and Richard R. Schrock on Wednesday won the Nobel Prize for a breakthrough in carbon chemistry that opens the way to smarter drugs and environmentallyfriendlier plastics In its citation for the 2005 award for

Yves Chauvin of France and Americans

chemistry, the Nobel jury declared "fantastic opportunities" had resulted from the trio's work, in pharmaceuticals and so-called green chemistry. "Imagination will soon be the only

limit" to what kind of molecules can be built in the future, the jury said. The trio, who have a third of the

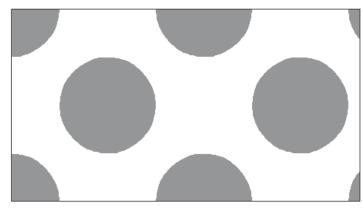

prize each, broke new ground in a process called metathesis.

The term, whose meaning is "changing places," entails using a catalyst to break the bonds of carbonbased molecules and then rearrange them to form new compounds.

Carbon is the most versatile
