Directorate of Continuing Education

Bangladesh University of Engineering & Technology BUET

Workshop on Cutting Edge IC/Chip Design and Implementation Practices with Global Industry Perspectives

22-23 December 2005 2 days

It has been observed that most of the talented engineering graduates especially in the field of EEE and CSE of our country, look for jobs in the western advanced countries and thereby contribute to the economy. Though they are fundamentally better academic candidates than candidates of many other countries, they fall behind compared to their counter-parts on real life applied, technical questions during job interviews and subsequent work if employed, due to some hurdles. Some of Bangladeshi graduates currently serving in the famous companies like IBM, Intel, FreeScale, Cirrus logic of USA have identified these hurdles.

The objective of the workshop is to introduce the latest technology associated with IC/Chip Design and Implementation practices. They will also discuss about the above hurdles and share their job experiences with the participants.

No of seats : 30

Participants: This special workshop is for the graduates, professionals and academia of Electrical & Electronic Engineering, Computer Science & Engineering and other allied disciplines.

Application in plain paper with full particulars stating academic qualifications and experiences should reach the Director, Directorate of Continuing Education (DCE), BUET on or before 18 Dec., 2005 (First come first served). Detail information can be obtained from the office of DCE.

Course Fee : Tk. 3,000/- per person, payable by Bank Draft / Pay Order/Crossed Cheque in favour of Director, BRTC, BUET. Applicants having fund problem may apply for partial/full waiver.

Professor Dr. Md. Imtiaz Hossain
Director, DCE (Institute Building, 3rd Floor), BUET
