Though most of the members of APC are amateurs who consider photography as their hobby, there are some who are going deeper into this field; namely Homaed Ishaque Moon and Touhidul Islam Tuhin. They are participating in the CHOBI MELA, the International Photography Festival of this year.

It's tough to give life to a thought but youngsters like Rahat and Moon could do it. They could succeed in providing the student community of AIUB a different window to see the world. Now it's the members who are to make it stronger, so that they can provide the world with a new vision.
