Interpretation of Dreams

AHMEDE HUSSAIN

Advocate Nagmul Huda alias CNG Huda

A lot of things may happen to you if you see this beleaguered politician in your dream; studies have shown that this actually depends on in what posture Huda comes to the beholder of the dream.

If you see him riding a CNG chances are there that you will be forced to buy things at a higher price. A dreamer has complained that after seeing him sit in front of a CNG auto rickshaw, in, what she now says, a nightmare, she has been sold one Kilogram of aubergine at 500 taka. Though she denies revealing the circumstances in which she has bought the vegetable at such an exorbitant price, we have come across numerous examples likes hers. The situation turns grave for any CNG driver who sees Huda in his sleep: one such driver has lost his job, his parents have disinherited him, his wife has left him for a blind man, both his sons have become addicted to alcohol, his only daughter has committed suicide-- all these have happened only after Shamsul Haque, the poor driver, one day, like a vision, saw Huda standing at a CNG stand near Shahbagh.

You are lucky if you are married and a woman. On your wedding anniversary, your husband will give you a huge plot of a government-owned land.

If you are a government official and susceptible to bribery, after seeing Huda you may start accusing every honest person of corruption, which will make you an object of everyone's mockery.

Seeing Huda may also cause obesity; consult your general physician if your appetite (for food, money, other's property) has increased significantly in the last few days.

Be careful if you are toying with the idea of start dealing in CNG-run vehicles.

To ward off the omen, the dreamer can try to join the Grameen Bank and do some voluntary work for three months.

Abdul Jalil alias Mr Complicated (Jotil)

Beware of your business partners if this person has been haunting your dream lately. Apart from ruining your business this may cause you to have a slurred voice and an uneven growth of hair in the most unlikely places of your body. Studies have shown that the victims sometimes become prone to mood swings, erratic behaviour like trying to walk on hands and a severe bout of halitosis.

If you see him in the morning, immediately before the Azan, and if you are facing the north while dreaming, chances are there that you will wake up from anonymity to being the proud owner of a Bank. But this is an extreme case, and readers are warned of taking this kind of dream lightly.
