

THE TOWERING INFERNO

Twas an unforgettable, horrifying experience for anybody present there on the day when a nine-storey building went into flames at Karwan Bazar on February 26. Over a thousand people were evacuated while scores trapped inside Bangladesh Steel and Engineering Corporation Bhaban. Dozens of offices were completely gutted. Four people died while choppers were used for the first time to rescue others. The living horror still reminds us of the helplessness of our poorly equipped fire fighters.
