Toshiba G900 Smartphone

TOSHIBA has started marketing its latest Smartphone : The all new WM6 Pro smartphone with QWERTY type key layout, WiFi, 2MP camera, tri-band HSDPA(**High-Speed Downlink Packet Access**) and 800x400 touchscreen looks to be one of the best of its type with sleek features and a decent performance. International price is around $700, which is not too high considering all its features! Some of its key features include:

* Fingerprint sensor feature for extra security and easy menu navigation
* Full keyboard making it easy to write messages and emails on the move
* 3-inch wide, colour W-VGA display for enhanced viewing quality
* Full connectivity with Triband, HSDPA, 3G, EDGE, Bluetooth™, WiFi® and USB
* High speed internet access with worldwide HSDPA, 3G or WiFi
* Direct Push Email
* 2 mega pixel camera
* Secondary camera for video telephony
* Support for VoIP
* 64MB of internal memory and support for miniSD card
* Music playback

Roundtable Video Conference

Bill Gates recently announced about an upcoming gadget a Roundtable video conference kit, which is essentially a 360-Degree conferencing camera that's made up of four individual webcams to capture everyone that sits around a table. Hence, Roundtable. The concept is also known as a ringcam. Release date is still not confirmed but estimated price is around $3000.
