3-inch LCD screen (320 x 240 res)
SDHC-compatible SD card slot
Audio recording at 16bit/48kHz at 384 kbps bit rate
Measures 78.1 × 135.4 × 79.0 mm
Lithium ion battery lasts for approx 75 minutes

2 Ultra Thin MP3 Player with a BIG Capacity!!!

MP3 players are getting so small you could lose them in your pocket, but here's one that's a little easier to handle, the $42 (BDT 2940) USB Flash Card MP3 Player from Brando with a whooping memory of 2 GB! It weighs less than an ounce, holds two gigs of your favorite music, and looks like it has water droplets all over it. Don't like those? Brando even offers options of putting your own logo or whatever you want on those cards.
