Request for Expressions of Interest (EOI)

Memo No: Paribesh/CASE-PP/Bus Priority (local)/2008/27 Date: 08-01-2008

Short-listing of consulting firm for Pilot Bus Priority Corridor Pre-Feasibility Study Contract Package No. S11

- The People's Republic of Bangladesh has received a Japanese Policy and Human Resource Development (PHRD) Grant (No TF090407 BD) for preparation of the Clean Air and Sustainable Environment (CASE) Project and intends to apply part of the proceeds of this grant towards the undertaking of the above pre-feasibility study.
- The grant will be administered by a multi-sector Project Preparation Team (PPT), anchored at the Department of Environment (DOE), with membership from the MOC and DCC.
- The broader objective of the study is to address the problems of slow bus operating speeds and poor vehicle quality in Dhaka city by encouraging the introduction of better quality buses under the exclusive rights to operate a franchised BRT system or exclusive use of bus priority measures, e.g., reserved bus lanes.
- The study seeks to identify a pilot corridor for operating a franchise bus system or dedicated bus lanes for future mass transit like BRT.
- The consulting firm will be required to examine the six corridors as identified earlier in the Dhaka Strategic Transport Study and identify the maximum extent of bus priority up to and including full BRT which could be introduced and to recommend one corridor as pilot for immediate implementation.
- The key tasks of the study are as follows:
 - To review the conditions on the six corridors in terms of road geometry and condition, public transport demand and service quality and general traffic flows.
 - To determine the maximum feasible extent of bus priority on each corridor including BRT and to prepare conceptual designs.
 - To undertake a preliminary evaluation of each proposal including:
 - Economic assessment of the priority proposal
 - Financial assessment of the bus operation proposed
 - Operational assessment for all traffic and pedestrians
 - Environmental and social screening
 - Ease of implementation
 - To rank the corridors and recommend one as a pilot for immediate implementation.
- This study is time constrained and must be completed by the end of June 2008.
- It is envisaged that the study will be led by a recognized local consultancy firm. The selected firm should have the following minimum qualifications:
 - Relevant experience in urban public transport studies in South Asia,
 - Strong technical skills in bus priority and demand estimation,
 - Knowledge of Dhaka bus industry,
 - Proven ability to achieve results in a collaborative and team environment.
- The Project Director of the PPT now invites eligible consultants to express their interest in providing the above services. Interested companies must provide information indicating their professional capability and experience to perform the services. Such information shall include description of previous similar assignments carried out, staff resumes, current availability, organizational portfolio, financial capabilities and updated information regarding tax & VAT.
- The consultant will be selected in accordance with the procedures set out in the World Bank's guidelines, "Selection and Employment of Consultants by World Bank Borrowers" (May 2004).
- Interested consultants may obtain further information from background documents including a more detailed terms of reference at the address below during office hours on weekdays from 9am to 4pm.
- Expressions of interest for the above contract must be delivered to the address below on or before 24 January 2008 during office hours.
