

## LIFE DRENCHED IN RAIN

**L**IFE comes to a standstill in the capital as depression in the Bay brings in gales and freezing weather. The city is gripped by brisk wind and incessant drizzle often

turning into pouring rains flooding some areas. People from low-income groups are the hardest hit as they have to go out in spite of the inclement weather under the shelter of a piece of

plastic or a torn quilt. Life does not take a break for a rickshawpuller, for a janitor or for a day labourer.
