Holy Cross school and college have been successfully organizing a science festival every year until now and have always managed to enchant and involve the knowledge wanting young students from different colleges of the city. This year too the students and the teachers of Holy Cross college toiled to arrange the event that proffered the watchword, *Embrace Science-In its becoming*. To put it in the terms of Mrs.Rina Dash, principle of the college, students are the group of people who must initiate the practice of any given discipline in real life. Holy Cross college has been organizing such events to uphold the importance of science education and its relevance in our day-to-day lives moreover benefit the masses within the nation and around the globe. When asked how this year's arrangement asserts originality her reply was, ``the most amazing thing about this year's festival would be the number of participants which is roughly around 600.We were overwhelmed by the enthusiasm and the spirit of the students to learn and share their ideas regarding something as serious and out of the ordinary like science.' She also said, she sees a bigger and better future for this country as she finds hope in looking up to these young talents.

Some of the highly potential projects, almost ready to serve different purposes in actuality proved the intensity and the logicality of how these young minds tend to work.Anti-prank caller device by Notre dame college, Globe Electrolysis by Adamji Cantonment Public college, Alcohol production by Residential Model college, Improvement of the sewerage and TRO and Biodiesel by Holy Cross college were only a few of them. The college campus was beautifully festooned with awareness raising posters, advertisements for the Quiz competitions, which took place in two rounds, the preliminary and the final, math and science Olympiad and the fun debate. This year's festival had a new addition to its cheerfulness, which was the show of a popular science fiction movie called 'Day after Tomorrow'. This drew in a larger number of in house spectators as well as guests from other institutions.

There is no alternative to a self-reliant Bangladesh and for that; the knowledge of science must be acquired. Holy Cross believing in this viewpoint encourages students to participate in such events and allow their aptitude to do good the human kind. Thus, the final day of the festival and the prize giving ceremony started out with the pledge of installing science education by organizing more and more events like this. As the powerful familiar tune of our national anthem hovered around in the air, the guests of the afternoon were welcomed one by one by the principal and the science club members on to the stage.Mrs. Rina Dash in her speech welcomed everyone to peruse the knowledge of science. She thanked the sponsors and the participating institutions. Her word of appreciation was also given out for the teachers who worked hard to materialize this huge enterprise. Lastly, she thanked the science club president Naima Haque along with her team for the excellent supervision through out the program.
