

When I see that around 500 research papers were generated just because of this conference- I feel encouraged.' Mr. Abdul Sattar, PhD also shared his optimism. He said, ' In my view this conference was very well organized. I am particularly impressed by the enthusiasm shown by young academic staff and students; and the energy they employed in this event. For me it was the first visit to Bangladesh and I found people very warm, welcoming, respectful, polite and sincere in their jobs. I would like to thank the organizers and wish them all the best in future.' In the last day an invited session called 'A New era in Bangladesh higher education: joining the global alliance of emerging high performance research and education network' was conducted by Jabed. I. Khan, Ph.D, Professor, Department of Computer science, Kent University, USA. Professor Dr. Ehsanul Haque, member of UGC Bangladesh was also present with him as a supplementary speaker. Also for the first time in the history of ICCIT two international workshops on 'Internet and distributed computer system (IDCS2008)' organized by The University Of Melbourne, Australia and 'Data mining and artificial intelligence' were also held on 24th December in conjunction with ICCIT2008. The bandwagon came to an end by gala dinner and exclusive cultural show.
