

# Institutions helped stocks tick upward last week

STAR BUSINESS REPORT

A continued presence of institutional investors kept the capital market ticking upwards last week.

On week-on-week basis, the benchmark index of the Dhaka Stock Exchange, DSE General Index, rose 607 points, or 2.39 percent to 2,599.60 points on Thursday, the last trading day of the week.

The All Share Price Index also gained 49.72 points, or 2.35 percent to 2,161.8 points.

Analysts said the market entered into black the previous week on a government decision to install liquidity in the market through the help of the institutions.

The state-owned Investment Corporation of Bangladesh (ICB) continued to buy shares pushing prices up. Other institutional investors such as Sonali Bank, Janata Bank, Agrani Bank and Sadharan Bima also bought shares through the ICB, according to an analysis of Equity Partners Limited, an investment bank.

"These measures have helped increase investor confidence in the market, which had fallen to extreme lows in recent time," the analysis said.

However, it has been seen that the retail investors are taking short-term profits and are still quite wary of the whole situation.

"While the institutional investors continued their buying spree, the retailers were seen to be more interested in profit taking," it said.

When most investors are getting optimistic about the market, it is quite evident that the market is kept alive by the buying pressure from the institutions. The situation needs to be closely analysed so as to know whether the market can sustain its upward movement without the government support through the ICB and nationalised commercial banks, the EPL analysis added.

Both the total and daily average turnover increased by 28.17 percent. The total turnover on the premier bourse was Tk 1,493.30 crore last week against Tk 1,165.08 crore the previous week. The daily average turnover was Tk 298.66 crore last week, which was Tk 233.01 crore the previous week.

A total of 11,36,99,180 shares were traded on the DSE last week against 9,13,60,421 shares the previous week, which was 24.45 percent up.

Of the traded issues, 206 advanced, 69 declined and one remained unchanged.

The total market capitalisation rose by 1.79 percent to Tk 1,00,495.93 crore last week from Tk 98,731.36 crore the previous week.

The state-run Titas Gas topped the turnover leaders on the DSE last week with 11,82,150 traded shares worth Tk 57.41 crore, which was 3.84 percent of the total turnover.

The week's other turnover leaders were Beximco Pharma, Beximco, Shinepukur Ceramics, Summit Power, Aftab Automobiles, Eastern Housing, Grameen Mutual Fund One: Scheme and BSRM Steels Ltd-N.

"While the institutional investors continued their buying spree, the retailers were seen to be more interested in profit taking," it said.

Two, Golden Son and BSRM Steels.

Banking sector, which consists of about 35 percent of the total market capitalisation, lost its trading volume to less than 10 percent of the total turnover. Overall performance of the private commercial banks last year was more than impressive as their disclosed operating profit figure showed more than 25 percent growth; still this sector failed to get attention of the retail investors.

To meet the regulatory requirement,

all the banks have to increase their capital base which was done previously by mostly issuing stock dividend and for a couple of cases by rights issue.

This drive to strengthen their capital base eventually increased the liquidity of the banks share. Being a highly liquid share, absence of institutional investors and significant foreign portfolio investment repelled their obvious price appreciation. With the limited institutional investment, banking sector has shown some good resilience.

Most turbulent sector of the week was the engineering sector. Sixteen percent of the total turnover was invested in the engineering sector, although most of these investments were speculative investment.

Fuel and power sector was holding the prime focus of most of the investors as the newly formed government has taken strong initiative to increase power production. They set a target of adding 740 MW of new electricity to the national grid within July this year.

The state-run Titas Gas topped the turnover leaders on the DSE last week with 11,82,150 traded shares worth Tk 57.41 crore, which was 3.84 percent of the total turnover.
