

Xtreme 500W
1ST ANNIVERSARY

SUCCESS 365

A year ago, BSRM introduced Grade 500 steel in Bangladesh - BSRM Xtreme.

This steel, currently the international standard for modern construction, came to you with a promise – to make structures safer, stronger, more durable, and on par with the rest of the world, while still being cost-effective.

A warm thanks to our patrons, dealers, distributors, partners and most importantly, to you, the ones who chose to build safe - for believing in us, for helping us keep that promise.

Our success is truly yours.

BSRM
the ultimate steel
