both girls and boys, three hundred fifty of them resident students. Learners receive high standard of education because of sincere efforts of founder principal Mizanur Rahman and A B Foundation education adviser Alhaj Md Abdus Sattar. Because of devotion of 42 dedicated teachers, 39 students got GPA 5 and seven others got GPA 4.39 in this year's SSC examination. The percentage of pass is hundred per cent. Last year, the school got 12 talent pool scholarships in primary scholarship examination and 10 scholarships in junior scholarship examination. Since 2002 till date, performance of the students is highly commendable.

The school provides facilities for study upto class ten. The school has a modern academic building, science laboratory, library and auditorium. Resident students have separate dormitories for boys and girls with dining and prayer room facilities. A large playground on the campus is another attraction of the school. All necessary implements of games and sports are supplied to the students as regular exercise is mandatory to them.

Surrounded by flower and fruit gardens, the school provides improved health care services to students. Milk and fish are supplied to students from the school farms. Students participate regularly in extra-curriculum activities. Apart from academics the school encourages students to take part in a range of diverse activities such as music, theatre, dance, nature club, environmental protection, publishing in-house magazines, organizing debates and lectures and participating in inter and intra school competitions. Such activities improve creativity, enhance confidence levels, inculcate discipline, enhance leadership qualities and abilities and stimulate the student to become a team player. Still the school needs help in so many forms. Government and donor agencies as well as philanthropists should come forward with generous financial aid for improvement of the rural school. Hats off to freedom fighter Amjad for his hard efforts to bring up the kids in the village (the future of Bangladesh), trying to bridge the ever growing gap between the rich and poor.
