Investing in the Green Delta Mutual Fund (hereinafter the Fund) bears certain risks that investors should carefully consider before investing in the Fund. Investment in the capital market and in the Fund bears certain risks that are normally associated with making investments in securities including loss of principal amount invested. There can be no assurance that the Fund will achieve its investment objectives. The Fund value can be volatile and no assurance can be given that investors will receive the amount originally invested. When investing in the Fund, investors should carefully consider the risk factors outlined below, which are not necessarily

1. General: There is no assurance that the Fund will be able to meet its investment objective and investors could potentially incur losses, including loss of principal when investing in the Fund. Investment in the Fund is not guaranteed by any government agency, the Sponsor or the AMC. Mutual funds and securities investments are subject to market risks and there can be no assurance or guarantee that the Fund's objectives will be achieved. As with any investment in securities, the Net Asset Value of the Fund may go up or down depending on the various factors and forces affecting the capital markets. Past performance of the Sponsors and their affiliates and the AMC do not indicate the future performance of the Fund. Investors should study this Offer Document carefully in its entirety before investing. External Risk Factor: Performance of the Fund is substantially dependent on the macroeconomic situation and in the capital market
of Bangladesh. Political and social instability may have an adverse effect on the value of the Fund's assets. Adverse natural climatic
condition may impact the performance of the Fund.

Market Risk: The Bangladesh capital market is highly volatile and mutual fund prices and prices of securities can fluctuate significantly. The Fund may lose its value or incur a sizable loss on its investments due to such market volatility. Stock market trends indicate that prices of majority of all the listed securities move in unpredictable direction which may affect the value of the Fund. Furthermore, there is no guarantee that the market prices of the units of the Fund will fully reflect their underlying NetAsset Values. Concentration Risk: Due to a limited number of listed securities in both the DSE and CSE, it may be difficult to invest the Fund's assets in a widely diversified portfolio as and when required to do so. Due to a very thin secondary fixed income/debt market in Bangladesh, it would be difficult for the Fund Manager to swap between asset classes, if and when required. Limited options in the money market instruments will narrow the opportunity of short term or temporary investments of the Fund which may adversely

Dividend Risk: Despite careful investment selection of companies in the Fund, if the companies fail to provide the expected dividend or fail to disburse the dividends declared in a timely manner, this will impact the income of the Fund and the overall return

Underlying Liquidity Risk: For investing in Pre-Public Offer Placement securities i.e. in unlisted equity securities by the Fund, may involve liquidity risk. In addition, market conditions and investment allocation may have an impact on the ability to sell securities during periods of market volatility. Debt securities, while somewhat less liquid, lack a well-developed secondary market, which may restrict the selling ability of the Fund and may lead to the Fund incurring losses till the security is finally sold. While securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges and may lead to the Fund incurring losses till the security is finally sold. Investment Strategy Risk: Since the Fund will be an actively managed investment portfolio, the Fund is subject to management strategy risk. Although the AMC will apply its investment process and risk minimization techniques when making investment decisions for the Fund, there can be no guarantee that such process and techniques will produce the desired outcome.

Credit Risk: Since the Fund will seek to also invest as per the Mutual Fund Regulations (2001) in both equity and fixed income securities, the credit risk of the fixed income issuers is also associated with the Fund. Investment in fixed income securities are subject to the risk of an issuer's inability to meet interest and principal payments on its obligations and market perception of the 9. Interest Rate Risk: The Net Asset Value (NAV) of the Pund, to the extent invested in Debt and Money Market securities, will be affected by changes in the general level of interest rates. The NAV of the Fund is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates. In addition, zero coupon securities do not provide periodic interest payments to the holder of the security; these securities are more sensitive to changes in interest rates. Therefore, the interest rate risk of zero coupon securities is higher. The AMC may choose to invest in zero coupon securities that offer attractive yields. This may increase the risk of the portfolio.

10. Issuer Risk: In addition to market and price risk, value of an individual security can, in addition, be subject to factors unique or specific to the issuer, including but not limited to management malfeasance, lack of accounting transparency, management performance, management decision to take on financial leverage. Such risk can develop in an unpredictable fashion and can only be partially mitigated, and sometimes not at all, through research or due diligence. To the degree that the Fund is exposed to a security

whose value declines due to issuer risk, the Fund's value may be impaired THE MUTUAL FUND IS NOT GUARANTEEING OR ASSURING ANY RETURNS

will not be very costly for retail investors to achieve.

A typical mutual fund is an investment fund that pools money from unit holders and invests in a diversified portfolio of securities. The mutual fund industry has a long history tracing as far back as the early 1800's with its humble beginnings generally considered to be in Europe. Today, mutual funds are widely considered to offer investors attractive risk adjusted returns by pooling assets for various investment purposes. The mutual fund industry came into wide public prominence in the mid 1980's and during the 1990's technology boom with fund managers when the likes of Michael Price and Peter Lynch, were considered the new investment gurus with their impressive mutual fund returns. Since then the industry has gone through peaks and through but have largely managed to flourish and grow both in the developing market and developed markets of the world. The mutual fund industry in Bangladesh is at its early or nascent stages, offering room for greater growth and product innovation. Investing in a mutual fund especially for retail investors should be an attractive proposition mainly due to: • Professional Management - mutual funds are actively managed by qualified investment professionals with an objective to limit downside risk and improve the upside potential with active management Diversification Benefit - mutual funds are generally diversified pooled investment which is expected to reduce the risk per adjusted

· Efficiency and Economies of Scale - mutual funds by pooling together a large portfolio can negotiate competitive commissions and fees, which results in lower costs to the investors. Transparency - mutual funds are highly regulated investment vehicles and operate under strict rules and regulations by the Securities and Exchange Commission.

Green Delta Insurance Company Limited (GDIC), one of the first private general insurance companies in Bangladesh, has decided to sponsor and launch a mutual fund. The Board of Directors and senior management of GDIC strongly believe sponsoring a mutual fund is an efficient and effective means of expanding its capital market investment alternatives that will result in an attractive and stable income source for GDIC and lead to greater development of the capital markets in Bangladesh. To further this initiative, LR Global Bangladesh Asset Management Company will be the Asset Manager for Green Delta Mutual Fund, with Bangladesh General Insurance Company (BGIC) as the Trustee of the Fund and Standard Chartered Bank (SCB) as the Custodian of the Fund.

2.2 RATIONALE FOR LAUNCHING PROPOSED MUTUAL FUND UNDER CURRENT CAPITAL MARKET CONDITIONS In contrast to the global meltdown in world markets, the capital market in Bangladesh has remained relatively unscathed compared to mostly negative and sluggish growth for most of the world equity indices. As of May 2010 DSE turnover stood at approximately Tk. 1933 crore which is 296% increase from May 2009 and 304% increase from May 2008 respectively. As the Bangladesh capital markets continue to evolve and reach new heights, the mutual fund industry offers significant growth potential. By most measures the current mutual funds in the market, which number approximately 24 in total, represent a very small percentage of the total domestic market capitalization; thus there exists greater scope for market growth in the mutual fund sector. As a number of mutual funds are currently in process to come to market, a paradigm shift will take place with institutions and professional money managers representing a more sizable and reasonable proportion of the market versus retail and short term investors. This shift will help to reduce unnecessary market volatility, lead to more rational price discovery and limit the influence of rumor-based trading in the market on a day-to-day basis. This growth and maturity in the market is necessary to attract and inject stable and long-term domestic and foreign institutional capital into the markets. Furthermore, the SEC and other market regulators and industry veterans view responsible expansion of mutual fund industry as key driver for further development of capital markets in Bangladesh. With the above framework in mind, Green Delta Insurance Company, a leading insurance company in Bangladesh has joined forces with LR Global Bangladesh to launch this mutual fund.

2.3 ADVANTAGES OF INVESTING IN GREEN DELTA MUTUAL FUND Generally investment in mutual funds provides certain incremental advantages when compared to investment made directly in individual securities in the capital market. Highlighted below are some of the advantages that investors may benefit from when investing in a mutual fund: Mutual funds generally lower investment risk for small and retail investors through diversification into multiple sectors, companies, securities, and via investing in various asset classes. The fund manager will attempt to maximize return for a given level of risk and always conduct a balance in his risk-return tradeoff.

Greater participation of mutual funds will add to enhanced liquidity to the overall market and, since most mutual funds are long term investment vehicles, this will create price stability and better price discovery and reduce short term volatility in market. The Fund's performance will benefit from the LR Global Bangladesh (AMC) proprietary investment process and research tools for both fundamental and technical analysis; AMC has a highly skilled in-house research team who are experienced investment professionals dedicated to analyzing in depth the Bangladesh stock market, its scripts and the impact of the broader macro factors that impact the markets. As the Fund will be professionally managed, investors will be relieved from the emotional stress associated with day-to-day management of individual investment portfolio.

Mutual funds through its diversified pool of investments will provide small investors access to returns of the wider market, which

5.3 ASSET MANAGER OF THE FUND LR Global has a long history of deep and extensive experience in investments in frontier countries including Bangladesh. LR Global was incubated within Rockefeller & Co., the family office started by John D. Rockefeller in 1891. LR Global Partners was founded in June 1997 by our principals, Leon Levy, his partner Jack Nash, and the Rockefeller family. It was intended as an extension of Murray and Don's successful strategy of investing in deeply undervalued securities in developing markets. Leon Levy (1926-2003) was, according to Forbes magazine, a "Wall Street investment genius and prolific philanthropist," who helped create both mutual funds and hedge funds. He cofounded Oppenheimer & Co. in 1959, where he started dozens of mutual funds that, at his death, had grown to more than \$120 billion. In 1982 he sold Oppenheimer to UK's Mercantile and co-founded Odyssey Partners, a private investment partnership. Its success helped it grow into a \$3 billion hedge fund before it was dissolved in 1997.

LR Global was built upon the Rockefeller tradition, Murray and Don's investment philosophy, and a disciplined investment process that continues to this day. Murray passed away in 2006, but Don continues with a seasoned management team that is conservative in its outlook and approach. Our competitive advantage continues to be our investment process and our unique ability to leverage long-standing knowledge in frontier markets to source undiscovered opportunities. Currently, we have offices or strategic partners in Vietnam, Cambodia, and Bangladesh with investments in over 15 frontier markets. Most of the principals worked at Rockefeller & Co. at some point in their careers. Don LaGuardia was a portfolio manager, Sean Wilson was their former Head of Research, and Bill Asmundson was CEO of Rockefeller & Co. and Reaz Islam joined as CEO of this organization on December 2008 after a distinguished 18-year career at Citigroup, with the last 12 years as the CEO of their Fixed Income Alternatives group and Senior Manager of Citigroup.

In 2008, the Principal's of LR Global founded LR Global Bangladesh Asset Management Company, a Dhaka based investment firm focused on providing a full range of investment products including management of equity portfolios for onshore and of fshore investors. Our investment objective is to provide superior risk adjusted returns over a medium to long term by investing in strong companies, with good management and at a great price by leveraging our time tested investment process. The investment specialists seek to provide consistent outperformance over time to its investors with a strong attention to risk management. We believe our investment process, grounded in the importance of fundamental research, allows our experienced investment professionals to identify quality growth opportunities in the capital markets.
