Eastern Refinery Limited
Expression of Interest for Financing BMRE Project of Eastern Refinery Limited

The Bangladesh Petroleum Corporation (BPC)/Eastern Refinery Limited (ERL) (Lead Agency) under the Ministry of Power, Energy & Mineral Resources/Energy & Mineral Resources Division (Lead Ministry) intends to increase its present capacity from 1.5 million TPA to 4.5 million TPA through BMRE project. The project has already been approved by the Government of Bangladesh. The consumption of petroleum oil products in Bangladesh at present is around 3.8 million metric tons per annum. ERL, the only petroleum refinery of Bangladesh is meeting around 30% of country's petroleum products consumption whereas 70% of the products are being imported as finished products.

BMRE of ERL is necessary in the light of the following:

- To provide desired energy security,
- To produce eco friendly fuels, complying with Euro-III specification,
- To reduce the petroleum products deficit of national demand.

A feasibility study for BMRE of ERL has been carried out recently by international consulting firm with IDB financing. The proposed BMRE Project will be installed in existing ERL area. Utilisation of existing infrastructures and sharing of common facilities, storage etc., will result in reducing investment cost.

ERL BMRE Project will be implemented in around three (03) years time.

The feasibility study indicates that estimated cost of ERL BMRE project is US\$ 867.00 million for the capacity of 3.0 million metric tons per annum. Out of this cost US\$ 709.00 million will be in foreign currency and remaining US\$ 158.00 million in local currency.

The financial and economic analyses have been carried out for ERL BMRE project considering three different crudes and crude mix processing options. The results of financial and economic analysis show that the project is highly attractive. The project generates an after tax return on fixed capital cost of 16.6% (20 years average), while IRR & IERR are around 20% and 23.5% respectively. The average annual foreign currency saving is US\$ 220 million. The payback period of the investment is 4.5 years.

For smooth reception of crude oil, the existing system for crude oil unloading is not sufficient, so a Single Point Mooring with pipe lines (SPM) is essential. Estimated cost of SPM project is USD 136.00 million. Islamic Development Bank has already signed an agreement with Government of Bangladesh to finance USD 129.00 million and remaining USD 7.00 million will be financed by GOB for this SPM project. For SPM project, selection of consultant is under process and expected completion time of the SPM project is December 2012.

In order to prepare a shortlist for financing of BMRE project, interested national/international bidders are requested to submit their proposal on any of the following options:

- Build-Own-Operate & Transfer (BOOT)
- Public Private Partnership (PPP)
- Financing only
- Any other suitable option.

Interested bidders may obtain executive summary of feasibility study report from ERL.

Expressions of interest to be submitted to the address below by 10th August, 2010 clearly marked as "Expressions of Interest for Financing BMRE Project of Eastern Refinery Limited".
