## People worried

FROM PAGE 16 Referring to the economic successes of China, he said, "I think a talent-based administration -- not the political cadres - is behind the rise of China."

The Institute of Good Governance (IGS) of Brac University published the report, and the ceremony was held in the auditorium of Journalism Training and Research Initiative (Jatri) in the capital.

The report included policy research findings about the country's energy crisis, food security, digital Bangladesh, and migration of workers to

foreign countries. It said Bangladesh has good policies and regulations, but lacks effective implementation. The government also takes rather populist and short-term plans in important sectors, which are not sustainable in the

"Institutions in Bangladesh are not working. There is a lack of commitment to reforming the institutions," said Irum Ali, editor of the report.

Addressing the audience as the chief guest, former chief ustice Habibur Rahman said since the independence of the country, it has become difficult for the bureaucracy to control pro-ruling party officials.

"As a result, system loss in the public service sector has been increasing continuously."

The function of a government is to uphold public interest, not private ones, and that requires having a skilled administration. However, it has been seen in the last forty years that governments with two-thirds majority tend to run amok, he

It would be quite disappointing if the members of parliament only say 'yes' or 'no' in the House, leaving the responsibility of framing laws to someone else, he said.

Stating that the constitution of the country has been violated

### since the independence, the former chief justice said traditionally the general secretaries of ruling parties are appointed as the local government minister, who usually concentrate on

public interest. "Now, power of the MPs in local government institutions is being increased beyond imagination," Habibur Rahman pointed out, urging all to adhere to the constitution, and to make

partisan interests rather than

the administration effective. The report said private sector participation in the energy sector is being encouraged, but it lacks a regulatory mechanism. Right people are also not being posted to right places in the bureaucracy, and that ultimately making it inefficient, the report added.

IGS Chief of Programme Christina Rozario said the government has a number of social safety net programmes, but the ultra poor people often do not get the benefit of those. There are also much irregularities in government land distribution to the landless, she said.

The government wants to create a digital Bangladesh and framed the ICT Act, but institutions concerned actually do not reflect that they own the idea, she said adding, the concept appears as more of a technical issue, rather than an issue of taking the benefits of technology to the people.

On workers' migration, the report said the cost of getting overseas jobs is very high and jobseekers are harassed in the migration process, and at workplaces. There is a serious lack of regulation to protect migrant workers who contribute to the national economy immensely, it said.

BRAC University Pro-vicechancellor Md Golam Samdani Fakir, and IGS Director Manzoor Hasan also spoke at

## Anamika

ROM PAGE 16

hospital on September 24 and shifted her to the city's Shishu Hospital two days later fearing the cost of treatment at Ayesha Memorial. But they brought Anamika back to Ayesha Memorial Hospital on September 29 as her condition deteriorated.

"We whisked her back to this hospital [Ayesha Memorial] when she developed a severe breathing difficulty and her skin turned blue, said Anil, the father.

But the unfortunate parents now want to take Anamika back to village as they have gone far beyond the capacity to bear the medical expense. By this time, the day labourer father has spent Tk 80,000 on the treatment. He has sold the family's last resort, the land they used to live on, and borrowed from friends and relatives to collect money.

"I am totally broke and cannot continue my daughter's treatment here," Anil choked several times with emotion while saying this to

The Daily Star yesterday. "It will take around Tk 10 akh for the treatment which is simply impossible for me to

manage," he added. Anil and Geeta have been cutting all sorts of expenses by

living in the corridors of the hospitals and eating bread, biscuits and banana for the last eight days.

### OMS of rice extended to upazilas

STAFF CORRESPONDENT

The government yesterday extended open market sales (OMS) of rice to the upazila level following a price hike of rice, flour and other commodities in domestic markets.

The programme allows an individual to buy 5 kg of rice a dayatTk24.

Three dealers from each upazila will get one tonne of rice a day from the government stock, said Badrul Hasan, director of the Directorate General of Food, in a meeting at the Ministry of Food and Disaster Management.

According to the Trading Corporation of Bangladesh, coarse rice now sells at Tk 32-34 and flour at Tk 28-33 a kg, which marks 20-44 percent and 21-53 percent increase in a year.

The food ministry asked the concerned officials to sincerely monitor the OMS operations and report on the sales and market situation regularly to gain desired outcome of the programme.

The programme was launched during Ramadan in the capital, divisional cities and some other districts affected by floods and cyclones.

### 3 jailed over trading of polybags

STAFF CORRESPONDENT

A mobile court yesterday sentenced three businessmen at city's Karwan Bazar to short-term jail on charge of selling banned polybags. The court also fined four

polythene traders Tk 31,000 seized more than three tonnes of polybags and sealed a store during the drive. After a weeklong break, the

Department of Environment (DoE) resumed the antipolythene drive yesterday. Executive Magistrate Roni Chakma led the mobile court accompanied by DoE officials, Rab and police members. The mobile court sen

tenced Abdur Razzak and Md Kaiyum to 15 days in jail each while Md Bachchu Mia to 30

"Even though these traders were fined earlier, they did not stop selling polybags, and so they have been sent to jail," Sukumar Biswas, director of DoE, told reporters.

The court fined Md Shahjalal Tk 1,000, Md Mamun Tk 10,000, Masud Tk 10,000 and Zakir Tk 10,000.

Sensing the presence of the mobile court Zakir shut down his store and fled the scene. At the direction of the magistrate, DoE broke in and seized polybags from the store. Later, the shop was sealed.

Tagore passed the order after hearing a government petition seeking modification of the HC judgment over the four

Following a public interest litigation filed by Human Rights and Peace for Bangladesh (HRPB), the HC on June 25 last year directed the government to remove all structures from the four rivers.

The court on March 21 this year modified the directives and ruled that the structures set up by the government in public interests will not be removed.

The attorney general's office on Monday filed the petition either for modification of the earlier HC directives for removing the jetties, or for two years' time to dismantle the structures.

During the hearing yesterday, Additional Attorney General Murad Reza told the court the government has been removing structures from the four rivers around Dhaka as per the HC directives, and it needs more time to remove the heavy structures like jetties.

HRPB lawyer Manzill Murshid argued that the government has an intention to protect the jetties, which were set up by influential

businessmen. If the jetties are not removed, the rivers will not be saved, he added.

FROM PAGE 16 also of innumerable industrial synthetics.

"It is important to emphasise the great significance their discoveries have for both academic and industrial research and in the production of fine chemicals -- including pharmaceuticals, agricultural chemicals and high-tech materials -- that benefit society," the Royal Swedish Academy of Sciences said.

Through their work, organic chemistry has developed into "an art form, where scientists produce marvellous chemical creations in their test tubes," it said.

Heck, 79, retired in 1989 from the University of Delaware in the United States; Negishi, 75, was also based in the United States, at Perdue University in Indiana; Suzuki, 80, was based at Hokkaido University in Sapporo, Japan.

The trio developed a process known as palladium-catalysed cross coupling, a means of knitting carbon atoms together so that they form a stable "skeleton" for organic molecules.

It has allowed chemists to synthesise compounds to fight colon cancer, the herpes virus and HIV, as well as smarter plastics that are used in consumer applications, such as ultra-thin computer monitors.

The discoveries "have had a great impact on academic research, the development of new drugs and materials, and are used in many industrial chemical processes for the synthesis of pharmaceuticals and other biologically active compounds," the academy

on four previous occasions for breakthroughs in organic chemistry -- in 1912, 1950, 1979 and 2005.

groundwork for coupling between carbon atoms by using a catalyser, or chemical to promote the process.

This was fine-tuned in 1977 by Negishi, who used a field of compounds known as organohalides, and taken a step further by Suzuki, who found a practical way to carry out the process using so-called

saying.

The White House yesterday backed the idea of Afghan government reconciliation talks with the Taliban, but said the United States was not a party to reported contacts between Kabul and militia leaders.

The Washington Post had earlier reported that the Taliban and the government of Afghan President Hamid Karzai had begun high-level talks over a negotiated end to the war, which it said were authorized by Taliban leader Mohammad Omar.

White House spokesman Robert Gibbs said the Obama administration had "long supported" an "Afghan-led reconciliation effort," though did not specifically confirm the contents of the Post report.

"We and the Afghans have said that ... requires a renunciation of Al-Qaeda, following Afghan law and a renunciation of violence," he said adding that such talks had to be conducted by Afghans.

"This is not something Abdul Jabbar
